Borderline Peter Kenneth Chadwick,1992 *Borderline* provides a study of the disturbed mind Professional psychologist Peter Chadwick draws upon his own personal experience of madness to provide a exploration of the psychology of paranoia and schizophrenia The book goes beyond a narrowly focused analytical approach to examine schizophrenia from as many perspectives as possible Using participant observation introspection case study and experimental methods Chadwick shows how paranoid and delusional thinking are only exaggerations of processes to be found in normal cognition Impressed by the similarities between the thinking of mystics and psychotics he argues that some forms of madness are closely related to profound mystical experience and intuition but that these are expressed in a distorted form in the psychotic mind He explores the many positive characteristics and capabilities of paranoid patients providing a sympathetic account which balances the negative constructions usually put on paranoia in the research literature *Borderline* provides many novel insights into madness and raises important questions as to how psychosis and psychotics are to be evaluated psychotherapists and students of religion and psychology *The Cumulative Book Index* ,1933 *National Library Service Cumulative Book Review Index, 1905-1974: Titles.
