Clinical Psychology Stefan G. Hofmann, 2017-10-23. The first book to offer a truly global perspective on the theory and practice of clinical psychology. While clinical psychology is practiced the world over, up to now there has been no text devoted to examining it within a global context. The first book of its kind, *Clinical Psychology: A Global Perspective*, brings together contributions from clinicians and scholars around the world to share their insights and observations on the theory and practice of clinical psychology. Due partly to language barriers and entrenched cultural biases, there is little cultural cross-pollination within the field of clinical psychology. In fact, most of the popular texts were written for English-speaking European and Anglo-American audiences and translated for other countries. As a result, most psychologists are unaware of how their profession is conceptualized and practiced in different regions or how their own practices can be enriched by knowledge of the theories and modalities predominant among colleagues in other parts of the world. This book represents an important first step toward rectifying that state of affairs. Explores key differences and similarities in how clinical psychology is conceptualized and practiced with children, adolescents, and adults across different countries and cultures. Addresses essential research methods, clinical interviews, psychometric testing, neuropsychological assessments, and dominant treatment

modalities Follows a consistent format with each chapter focusing on a specific area of the practice of clinical psychology while integrating cultural issues within the discussion Includes coverage of how to adapt one's practice to the differing cultures of individual clients and how to work in multidisciplinary teams within a global context Clinical Psychology A Global Perspective is a valuable resource for students trainees and practicing psychologists especially those who work with ethnic minority groups or with interpreters It is also a must read for practitioners who are considering working internationally
