

## Ipod Take Apart

The initial step in the iPod disassembly is the most difficult. We highly recommend using a flat blade nylon tool for this step to avoid scratching your casing.

Starting in the corner nearest the firewire port, pry up with your flat tool at the spot where the metal and white plastic meet. You may need to work your tool into the groove a bit and then pry up. The white plastic will then lift up slightly

The case should open in a similar way to the picture on the left. Notice that the case has notches in the plastic.

Use your flat tool to gently pry the casing up all along these notches to release the plastic casing from the metal pan.
