## **Elementary Differential Geometry Pressley Solution Manual:**

**Elementary Differential Geometry** A.N. Pressley, 2010-03-10 Elementary Differential Geometry presents the main results in the differential geometry of curves and surfaces suitable for a first course on the subject Prerequisites are kept to an absolute minimum nothing beyond first courses in linear algebra and multivariable calculus and the most direct and straightforward approach is used throughout New features of this revised and expanded second edition include a chapter on non Euclidean geometry a subject that is of great importance in the history of mathematics and crucial in many modern developments The main results can be reached easily and quickly by making use of the results and techniques developed earlier in the book Coverage of topics such as parallel transport and its applications map colouring holonomy and Gaussian curvature Around 200 additional exercises and a full solutions manual for instructors available via [www.springer.com](http://www.springer.com) ul

**Conformal Geometry** Miao Jin, Xianfeng Gu, Ying He, Yalin Wang, 2018-04-10 This book offers an essential overview of computational conformal geometry applied to fundamental problems in specific engineering fields It introduces readers to conformal geometry theory and discusses implementation issues from an engineering perspective The respective chapters explore fundamental problems in specific fields of application and detail how computational conformal geometric methods can be used to solve them in a theoretically elegant and computationally efficient way The fields covered include computer graphics computer vision geometric modeling medical imaging and wireless sensor networks Each chapter concludes with a summary of the material covered and suggestions for further reading and numerous illustrations and computational algorithms complement the text The book draws on courses given by the authors at the University of Louisiana at Lafayette the State University of New York at Stony Brook and Tsinghua University and will be of interest to senior undergraduates graduates and researchers in computer science applied mathematics and engineering
