The Physics and Astrophysics of Neutron Stars Luciano Rezzolla,Pierre Pizzochero,David Ian Jones,Nanda Rea,Isaac Vidaña,2019-01-09 This book summarizes the recent progress in the physics and astrophysics of neutron stars and most importantly it identifies and develops effective strategies to explore both theoretically and observationally the many remaining open questions in the field Because of its significance in the solution of many fundamental questions in nuclear physics astrophysics and gravitational physics the study of neutron stars has seen

enormous progress over the last years and has been very successful in improving our understanding in these fascinating compact objects The book addresses a wide spectrum of readers from students to senior researchers Thirteen chapters written by internationally renowned experts offer a thorough overview of the various facets of this interdisciplinary science from neutron star formation in supernovae pulsars equations of state super dense matter gravitational wave emission to alternative theories of gravity The book was initiated by the European Cooperation in Science and Technology COST Action MP1304 Exploring fundamental physics with compact stars NewCompStar *An Introduction to Gravity* Joel Franklin, 2024-04-11 Einstein's theory of gravity can be difficult to introduce at the undergraduate level or for self study One way to ease its introduction is to construct intermediate theories between the previous successful theory of gravity Newton's and our modern theory Einstein's general relativity This textbook bridges the gap by merging Newtonian gravity and special relativity by analogy with electricity and magnetism a process that both builds intuition about general relativity and indicates why it has the form that it does This approach is used to motivate the structure of the full theory as a nonlinear field equation governing a second rank tensor with geometric interpretation and to understand its predictions by comparing it with the often qualitatively correct predictions of intermediate theories between Newton's and Einstein's Suitable for a one semester course at junior or senior level this student friendly approach builds on familiar undergraduate physics to illuminate the structure of general relativity *Chemical News and Journal of Industrial Science*, 1927 **ITJEMAST 12(1) 2021**, 2020-11-16 International Transaction Journal of Engineering Management Applied Sciences Technologies publishes a wide spectrum of research and technical articles as well as reviews experiments experiences modelings simulations designs and innovations from engineering sciences life sciences and related disciplines as well as interdisciplinary cross disciplinary multidisciplinary subjects Original work is required Article submitted must not be under consideration of other publishers for publications <http://TuEngr.com> *The Chemical News and Journal of Industrial Science*, 1927 **Inequalities for Differential Forms** Ravi P. Agarwal, Shusen Ding, Craig Nolder, 2009-09-19 This monograph is the first one to systematically present a series of local and global estimates and inequalities for differential forms in particular the ones that satisfy the A harmonic equations The presentation focuses on the Hardy Littlewood Poincare Caccioppoli imbedded and reverse Holder inequalities Integral estimates for operators such as homotopy operator the Laplace Beltrami operator and the gradient operator are discussed next Additionally some related topics such as BMO inequalities Lipschitz classes Orlicz spaces and inequalities in Carnot groups are discussed in the concluding chapter An abundance of bibliographical references and historical material supplement the text throughout This rigorous presentation requires a familiarity with topics such as differential forms topology and Sobolev space theory It will serve as an invaluable reference for researchers instructors and graduate students in analysis and partial differential equations and could be used as additional material for specific courses in these fields ITJEMAST 10(15) 2019, International Transaction Journal of Engineering Management Applied Sciences
