

## Introduction to Similar Figures and Scale Factors

### What are similar figures?

- Similar figures are the same shape, but can be different sizes. The sign  $\sim$  indicates that two shapes are similar. For example if  $\triangle PQR \sim \triangle TUV$  is stating that triangle  $PQR$  is similar to triangle  $TUV$ .
- Similar figures have proportionate side lengths, which means that some scale factor is used to scale up or down all measurements of the figure.
- Similar figures have congruent angle measures. The scale factor changes the lengths of the sides, but not the measures of the angles.

### Corresponding side lengths

Knowing which sides correspond to each other is very important when working with similar figures. Sometimes it's easy to tell which sides correspond, like in the figures below:

Side  $BC$  corresponds to side  $FG$ . Which side do you think corresponds to side  $ED$ ? \_\_\_\_\_. Which side do you think corresponds to side  $FE$ ? \_\_\_\_\_

However, sometimes it is a lot trickier to identify corresponding sides because the shape has been rotated or flipped around. You can find corresponding sides using the order of the letters in the name.

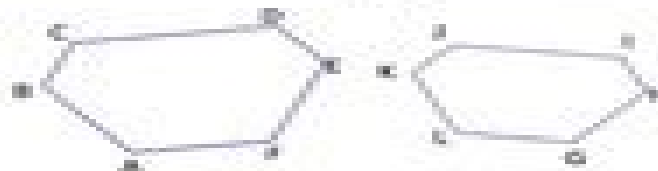

$\triangle ABC \sim \triangle DEF$

I know side  $AB$  corresponds to side  $DE$  because  $A$  and  $D$  are the first two letters in the names of the first triangle and  $E$  and  $F$  are the first two letters in the name of the second triangle.

Which side would correspond to side  $BC$ ? \_\_\_\_\_. Which side would correspond to side  $EF$ ? \_\_\_\_\_

**Practice:** Given that polygon  $ABCODEF \sim GHVJEL$ , state the corresponding side.

$AB$  corresponds to \_\_\_\_\_.  $EF$  corresponds to \_\_\_\_\_

$BC$  corresponds to \_\_\_\_\_.  $DE$  corresponds to \_\_\_\_\_

$CD$  corresponds to \_\_\_\_\_.  $FE$  corresponds to \_\_\_\_\_

Being able to identify corresponding sides in similar shapes will be very important when you need to find missing measures in a set of similar figures. If sides  $AB$  and  $EF$  are corresponding it means that side  $AB$  became side  $EF$  when it was multiplied by the scale factor, or vice versa.

**Exploring the Trans-Neptunian Solar System** National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Commission on Physical Sciences, Mathematics, and Applications, Committee on Planetary and Lunar Exploration, 1998-04-29 In the last decade our knowledge of the outer solar system has been transformed as a result of the Voyager 2 encounter with Neptune and its satellite Triton and from Earth based observations of the Pluto Charon system. However the planetary system does not simply end at the distance of Pluto and Neptune. In the past few years dozens of bodies have been discovered in near circular low inclination orbits near or beyond the orbit of Neptune. These bodies are now believed to be directly related to each other and to Pluto Charon and Triton and as a class they define and occupy the inner boundary of a hitherto unexplored component of the solar system the trans neptunian region. Exploring the Trans Neptunian Solar System reviews current understanding of the trans neptunian solar system and makes recommendations for the future exploration of this distant realm. *Exploring the Convergence of Big Data and the Internet of Things* Prasad, A.V.

**God and Science** Sridharan T.K.R., 2022-07-12 This book is about God and Science, exploring the concept of God with particular reference to Sanatana Dharma, also known as Hinduism. Sanatana Dharma is an eternal religion and irrespective of a particular individual's faith, universally it can be followed. Thus, Hinduism stands above all other religions and is a way of life that can be adopted as it is universal in adaptability. A classic example is that of Dr Annie Besant, the founder and president of the Theosophical Society of India, who remained a Christian despite adapting to the Hindu way of life. Want to know why we have to go to a temple to pray, why idol worship should be followed? The answers are here. Following Sanatana Dharma alone can give an individual God-realisation or liberation. The scientific basis of Sanatana Dharma is explored in detail in relevant chapters. In short, this book will be a lucid introduction to Sanatana Dharma. Every believer of God will find it worth reading to have a conceptual understanding of God, prayer and the science behind them.

**Illustration Research Methods** Rachel Gannon, Mireille Fauchon, 2020-12-20 Shortlisted for the 2021 British Book Design and Production Awards for the Best Jacket Cover Design. For years, illustration has lacked a strong critical history in which to frame it, with academics and media alike assessing it as part of design rather than a discipline in its own right. *Illustration Research Methods* addresses this void and adds to a fast-emerging discipline, establishing a lexicon that is specific to discussing contemporary illustration practice and research. The chapters are broken down into the various roles that exist within the industry and which illustration research can draw from, such as Reporting and Education. In doing so, users are able to explore a diverse range of disciplines that are rich in critical theory and can map these existing research methodologies to their own study and practice. Supported by a wealth of case studies from international educators, student projects sit alongside those of world-renowned illustrators. Thus, allowing users the opportunity to put what they have learnt into context and offering insight into the thinking and techniques behind some of illustration's greats.
