An Introduction to World Cinema, 2d ed. Aristides Gazetas, 2008-04-24 Motion pictures are more than just entertainment. In film studies courses in colleges and universities worldwide students and professors explore the social, political, technological and historical implications of cinema. This textbook provides two things: the history of film as an art form and an analysis of its impact on society and politics. Chapters are arranged chronologically covering the major developments in film like the advent of talkies or the French New Wave. Each era is examined in the context of several exemplary films commonly viewed in film studies courses. Thus students can watch *Birth of a Nation* and *Intolerance* while studying the innovations made by D W Griffith from 1910 to 1919. The scope is global embracing the cinematic traditions of Asia, Latin America and Africa as well as the ever important American and European output. Thoughtful articles from film scholars are included. The flexible structure of the text allows a variety of options for classroom use or personal study. Instructors considering this book for use in a course may request an examination copy here.

The Cinema Book Bloomsbury Publishing, 2019-07-25 The *Cinema Book* is widely recognised as the ultimate guide to cinema. Authoritative and comprehensive, the third edition has been extensively revised, updated and expanded in response to developments in cinema and cinema studies. Lavishly illustrated in colour, this edition features a wealth of exciting new sections and in-depth case studies. Sections address Hollywood and other World cinema histories, key genres in both fiction and non-fiction, film issues such as stars, technology and authorship, and major theoretical approaches to understanding film.

Asian America Through the Lens Jun Xing, 1998-07-15 In *Asian America Through the Lens* Jun Xing surveys Asian American cinema, allowing its aesthetic, cultural and political diversity and continuities to emerge.

Women and Images of Men in Cinema Andreas Hamburger, 2018-05-08 Women and men in cinema are imaginary constructs created by filmmakers and their audiences. The film psychoanalytic approach reveals how movies subliminally influence unconscious reception. On the other hand, the movie is embedded in a cultural tradition. Jean Cocteau's film *La Belle et la Bête* (1946) takes up the classic motif of the animal groom from the story of Cupid and Psyche in Apuleius. *The Golden Ass* originally a tale about the stunning momentum of genuine female desire liberates it from its baroque educational moral: a girl's virtue and prudence will help her to overcome her sexual fears and turns it into a boyhood story. Inside the ugly rascal, there is a good but relatively boring prince at least in comparison to the monsters of film history. In the seventy years since it was made, *La Belle et la Bête* has inspired numerous interpretations and has been employed by theorists of all genres and interests.
