Organize the timeline using audio lanes.

With a few clicks, you can arrange audio clips into the audio lanes, based on their role assignments. Audio has an associated, visually distinct layer in the timeline. This organizes audio clips clearly and provides enhanced editing capabilities and more efficient editing.

Organizing the timeline in this way does not affect the way your project is how it plays back in the viewer, it simply changes the timeline experience for your editing convenience.

You can organize your media however you like, and you can use the Library window and the browser to manage, view, sort, and add frequently to your imported media. For more information, see [Organizing libraries and browser](#).

**Play back clips and projects in the viewer**  
The viewer is where you play back your video, including clips and projects with full resolution and sound. You can play back projects, projects, or individual clips in full-screen view or in a second display. With the multi-view, a separate video display that can be shown next to the main viewer, you can display two clips at the same time: one from the browser and one from the timeline. For information about ways to play media, see [Play back media](#).
