Play back clips and projects in the viewer
The viewer is where you play back your video, including clips and projects with full resolution and sound. You can play back projects, projects, or individual clips in full-screen view or on a second display. With the event viewer, a separate video display that can be shown next to the main viewer, you can display two clips at the same time: one from the browser and one from the library. For information about ways to play media, see [Play back media](#).

Organize the timeline using audio lanes

With a few clicks, you can arrange audio clips into the audio lanes, based on their own assignments. Audio for an element, visually placed layers in the timeline. This organizes audio clips clearly and provides convenient access to editing audio and more efficient.

Organizing the timeline in this way does not affect the way your project is how it appears in the viewer or change the timeline experience for your editing convenience.

Note: When you display audio clips in separate lanes in the timeline, any clips that contain both audio and video are expanded to show audio and video separately.
