Strengthening the Military Family Readiness System for a Changing American Society National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on the Well-Being of Military Families, 2019-09-25 The U S military has been continuously engaged in foreign conflicts for over two decades The strains that these deployments the associated increases in operational tempo and the general challenges of military life affect not only service members but also the people who depend on them and who support them as they support the nation their families Family members provide support to service members while they serve or when they have difficulties family problems can interfere with the ability of service members to deploy or remain in theater and family members are central influences on whether members continue to serve In addition rising family diversity and complexity will likely increase the difficulty of creating military policies programs and practices that adequately

support families in the performance of military duties Strengthening the Military Family Readiness System for a Changing American Society examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families as well as lessons to be learned from these experiences This report offers recommendations regarding what is needed to strengthen the support system for military families

Reducing the Use of Highly Enriched Uranium in Civilian Research Reactors National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on the Current Status of and Progress Toward Eliminating Highly Enriched Uranium Use in Fuel for Civilian Research and Test Reactors, 2016-03-12 The continued presence of highly enriched uranium HEU in civilian installations such as research reactors poses a threat to national and international security Minimization and ultimately elimination of HEU in civilian research reactors worldwide has been a goal of U S policy and programs since 1978 Today 74 civilian research reactors around the world including 8 in the United States use or are planning to use HEU fuel Since the last National Academies of Sciences Engineering and Medicine report on this topic in 2009 28 reactors have been either shut down or converted from HEU to low enriched uranium fuel Despite this progress the large number of remaining HEU fueled reactors demonstrates that an HEU minimization program continues to be needed on a worldwide scale Reducing the Use of Highly Enriched Uranium in Civilian Research Reactors assesses the status of and progress toward eliminating the worldwide use of HEU fuel in civilian research and test reactors

Fairness in Educational and Psychological Testing: Examining Theoretical, Research, Practice, and Policy Implications of the 2014 Standards Jessica L. Jonson, Kurt F. Geisinger, 2022-06-01 This book examines scholarship best practice methodologies and examples of policy and practice from various professional fields in education and psychology to illuminate the elevated emphasis on test fairness in the 2014 Standards for Educational and Psychological Testing Together the chapters provide a survey of critical and current issues with a view to broadening and contextualizing the fairness guidelines for different types of tests test takers and testing contexts Researchers and practitioners from school psychology clinical counseling psychology industrial organizational psychology and education will find the content useful in thinking more acutely about fairness in testing in their work The book also has chapters that address implications for policy makers and in some cases the public These discussions are offered as a starting point for future scholarship on the theoretical empirical and applied aspects of fairness in testing particularly given the ever increasing importance of addressing equity in testing

Researching animal research Gail Davies, Beth Greenhough, Pru Hobson-West, Robert G. W. Kirk, Alexandra Palmer, Emma Roe, 2024-01-09 Every year around 80 million scientific procedures are carried out on animals globally These experiments have the potential to generate new understandings of biology and clinical treatments They also give rise to ongoing societal debate This book demonstrates how the humanities and social sciences can contribute to understanding what is created through animal procedures including constitutional forms of

research governance different institutional cultures of care the professional careers of scientists and veterinarians collaborations with patients and publics and research animals specially bred for experiments or surplus to requirements Developing the idea of the animal research nexus this book explores how connections and disconnections are made between these different elements how these have reshaped each other historically and how they configure the current practice and policy of UK animal research

Imperative of Economic Growth in the Eurozone: Competitiveness, Capital Flows and Structural Reforms Lubor Lacina, Antonin Rusek, 2017-11-30 European economic recovery appears to be taking hold So is the European crisis over The acute phase of the crisis passed however a number of medium and long term issues remain The policies of internal devaluations are working albeit slowly to restore competitiveness in the countries most affected by the crisis However growth remains at best sluggish The medium and long term outlook remains highly uncertain fomenting social tensions and endangering political stability The restoration of economic dynamism is increasingly perceived as the answer to the question of the European future economically politically and socially There is a broad consensus that dynamic structural reforms and the restoration of competitiveness at the level of the global economy are key answers to current European challenges However whatever the form these may take the transfer of resources is implicit and seemingly necessary to underpin the current structure of eurozone This indeed raises the question of governance both fiscal and monetary After all the provision of resources implies an allocation and it is hard to

imagine that resources will be provided to the common pool unless the providers have some say with respect to allocation And that requires some form of common i e centralized decision making procedures in all likelihood exceeding the common understanding of the *acquis communautaire* as it exists today i e some form of the effective political arrangement In this context the basic idea which connects all contributions in this volume is the analysis of the problems which affected the Eurozone in the past decade and the challenges and dilemmas the Eurozone will face in the coming years Approaches to Understanding the Cumulative Effects of Stressors on Marine Mammals National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Ocean Studies Board, Committee on the Assessment of the Cumulative Effects of Anthropogenic Stressors on Marine Mammals, 2017-05-04 Marine mammals face a large array of stressors including loss of habitat chemical and noise pollution and bycatch in fishing which alone kills hundreds of thousands of marine mammals per year globally To discern the factors contributing to population trends scientists must consider the full complement of threats faced by marine mammals Once populations or ecosystems are found to be at risk of adverse impacts it is critical to decide which combination of stressors to reduce to bring the population or ecosystem into a more favorable state Assessing all stressors facing a marine mammal population also provides the environmental context for evaluating whether an additional activity could threaten it Approaches to Understanding the Cumulative Effects of Stressors on Marine Mammals builds upon previous reports to assess current methodologies used for evaluating cumulative effects and identify new approaches that could improve these assessments This review focuses on ways to quantify exposure related changes in the behavior health or body condition of individual marine mammals and makes recommendations for future research initiatives **Physical Chemistry** Kenneth S Schmitz, 2018-06-14 The advancements in society are intertwined with the advancements in science To understand how changes in society occurred and will continue to change one has to have a basic understanding of the laws of physics and chemistry Physical Chemistry Multidisciplinary Applications in Society examines how the laws of physics and chemistry physical chemistry explain the dynamic nature of the Universe and events on Earth and how these events affect the evolution of society multidisciplinary applications The ordering of the chapters reflects the natural flow of events in an evolving Universe Philosophy of Science the basis of the view that natural events have natural causes Cosmology the origin of everything from the Big Bang to the current state of the Universe Geoscience the physics and chemistry behind the evolution of the planet Earth from its birth to the present Life Science the molecules and mechanisms of life on Earth Ecology the interdependence of all components within the Ecosphere and the Universe Information Content emphasis on how words and phrases and framing of issues affect opinions reliability of sources and the limitations of knowledge Addresses the four Ws of science Why scientists believe Nature works the way it does Who helped develop the fields of science What theories of natural processes tell us about the nature of Nature and Where our scientific knowledge is taking us into the future Gives a historical review of the evolution of science and the accompanying changes in the philosophy of how science views the nature

of the Universe Explores the physics and chemistry of Nature with minimal reliance on mathematics Examines the structure and dynamics of the Universe and our Home Planet Earth Provides a detailed analysis of how humans as members of the Ecosphere have influenced and are continuing to influence the dynamics of events on the paludarium called Earth Presents underlying science of current political issues that shape the future of humankind Emphasizes how words and phrases and framing of issues can influence the opinions of members of society Makes extensive use of metaphors and everyday experiences to illustrate principles in science and social interactions
