Final Exam For Honors Geometry:

The Geometric Supposer Judah L. Schwartz, Michal Yerushalmy, Beth Wilson, 2013-06-17 This volume is a case study of education reform and innovation using technology that examines the issue from a wide variety of perspectives It brings together the views and experiences of software designers curriculum writers teachers and students researchers and administrators Thus it stands in contrast to other analyses of innovation that tend to look through the particular prisms of research classroom practice or software design The Geometric Supposer encourages a belief in a better tomorrow for schools On its surface the Geometric Supposer provides the means for radically altering the way in which geometry is taught and the quality of learning that can be achieved At a deeper level however it suggests a powerful metaphor for improving education that can be played out in many different instructional contexts

Peano H. Kennedy, 2012-12-06 All students of mathematics know of Peano's postulates for the natural numbers and his famous space filling curve yet their knowledge often stops there Part of the reason is that there has not until now been a full scale study of his life and works This must surely be surprising when one realizes the length of his academic career over 50 years and the extent of his publications over 200 in a wide variety of fields many of which had immediate and long term effects on the development of modern mathematics A study of his life seems long overdue It appeared to me that the most likely person to write a biography of Peano would be his devoted disciple Ugo Cassina with whom I studied at the University of Milan in 1957-58 I wrote to Professor Cassina on 29 October 1963 inquiring if he planned to write the biography and I offered him my assistance since I hoped to return to Italy for a year He replied on 28 November 1963 suggesting that we collaborate meaning by this that I would write the biography in English using his material and advice I gladly agreed to this suggestion but work on the project had hardly begun when Professor

Cassina died unexpectedly on 5 October 1964 I then decided to continue the project on my own I spent the academic year
