 Botswana has been portrayed as a major case of exception in Africa as an oasis of peace and harmony with an enduring parliamentary democracy blessed with remarkable diamond driven economic growth Whereas the failure of other states on the continent is often attributed to the prevalence of indigenous political ideas and structures the author argues that Botswana s apparent success is not the result of Western ideas and practices of government having replaced indigenous ideas and structures Rather the postcolonial state of Botswana is best understood as a unique complex formation one that arose dialectically through the meeting of European ideas and practices with the symbolism and hierarchies of authority rooted in the cosmologies of indigenous polities and both have become integral to the formation of a strong state with a stable government Yet there are destabilizing potentialities in progress due to emerging class conflict between all the poor sections of the population and the privileged modern elites born of the expansion of a beef and diamond driven political economy in addition to conflicts between dominant Tswana and vast other ethnic groups These transformations of the modern state are viewed from the long term perspectives of precolonial and colonial genealogies and the rise of structures of domination propelled by changing global forces For the Learning of Mathematics ,1985 *African Books in Print* ,1978

The Khoe and San Shelagh M. Willet,2002 Compiled by the University of Botswana which houses a unique collection of contemporary published and unpublished written material on the indigenous minority of Southern Africa The aim was to make this literature available in one collection and thus promote research on with and by this minority The volume lists over a thousand bibliographic entries covering the social sciences languages and history as well as publications from national and regional San organisations Short abstracts of each entry are linked to a list of keywords and authors *Marang* ,2001
