Educational Change* Jill Adler,Anna Sfard,2016-06-17 Research for Educational Change presents ways in which educational
research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics
education it argues that while research generated insights can have beneficial effects on learning and teaching the question
of how these effects are to be generated and sustained is far from evident The question of how to turn research into
educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In
the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data
collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about
what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in
mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers
communicating their insights to those responsible for educational practice the book deals with the perennial question of
communication between those who study educational processes and those who are directly responsible for teacher education
educational research and classroom practices This book will be key reading for postgraduates researchers and academics in
education and particularly in the areas of mathematics education education research teacher education and classroom
practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research
