Form Five Selected Students List 2015:

Handbook of Employee Selection James L. Farr, Nancy T. Tippins, 2017-03-27 This second edition of the Handbook of Employee Selection has been revised and updated throughout to reflect current thinking on the state of science and practice in employee selection. In this volume a diverse group of recognized scholars inside and outside the United States balance theory research and practice often taking a global perspective. Divided into eight parts, chapters cover issues associated with measurement such as validity and reliability as well as practical concerns around the development of appropriate selection procedures and implementation of selection programs. Several chapters discuss the measurement of various constructs commonly used as predictors and other chapters confront criterion measures that are used in test validation. Additional sections include chapters that focus on ethical and legal concerns and testing for certain types of jobs e.g. blue collar jobs. The second edition features a new section on technology and employee selection. The Handbook of Employee Selection Second Edition provides an indispensable reference for scholars, researchers, graduate students and professionals in industrial and organizational psychology, human resource management and related fields.

The Wiley Handbook of School Choice Robert A. Fox, Nina K. Buchanan, 2017-05-01 The Wiley Handbook of School Choice presents a comprehensive collection of original essays addressing the wide range of alternatives to traditional public schools available in contemporary US society. A comprehensive collection of the latest research findings on school choices in the US including charter schools, magnet schools, school vouchers, home schooling, private schools and virtual schools. Viewpoints of both advocates and opponents of each school choice provide balanced examinations and opinions. Perspectives drawn from both established researchers and practicing professionals in the US and abroad and from across the educational spectrum gives a holistic outlook. Includes thorough coverage of the history of traditional education in the US, its current state and predictions for the future of each alternative school choice.

Making Megacities in Asia Du Huynh, 2019-10-19 This book analyses and compares the development paths of five major cities in East and Southeast Asia since the early 1960s, including Ho Chi Minh City, Jakarta, Manila, Seoul and Shanghai. In examining these five cases through a carefully crafted conceptual framework, the author excavates an understanding of the dynamics that have enabled Seoul and Shanghai to become highly competitive as major engines of economic growth while simultaneously accounting for why the other three cities have faced numerous problems in terms of meeting their development goals. Presenting both quantitative and qualitative data to trace the course of changes between 1960 and 2015, the case studies curate six possible explanations for the different cities' developmental trajectories. The book considers the national development strategy matters to the development of cities and positions the share of budget revenue retained for cities' expenditure as critical. The author

demonstrates that consistently pursuing long term strategies is important and that public entrepreneurship with powerful supporting coalitions is vital The book illustrates how master plans have played limited roles in the building of cities and that fragmented governments are often at the root of the problems facing a city s development This book will be highly relevant to researchers in international and Asian urban development Quantitative Reasoning in Mathematics and Science Education

Fraught with Pain Pereira, Isabel,Ramírez, Lucía,2019-09-04 This books seeks to facilitate linkages between discussions on the right to health and discussions on drug policy reform The populations we talk about here are the noes most in need of a change whereby drug culture measures cease to stand in the way of a life free from pain The suffering and pain experienced by people with terminal illnesses and people with heroin use disorder can be alleviated through opioids At the same time the enforcement of international drug control treaties means that these medicines are subjected to strict controls that create excessive red tape and contribute to generalized fear among patients and health professionals concerning these medicines use Although many opioids are included in the World Health Organization s list of essential medicines the fact that they are controlled substances means that in practice the right to health of these two populations often is violated *Fraught with Pain* offers a diagnosis of five Colombbian cities with regard to the barriers that both populations patients at the end of life and individuals with heroin use disorder face when trying to access opioids The hurdles they encounter can be grouped into four categories 1 Structural failings of the Colombbian health system 2 A lack of institutional capacity to maintain sufficient opioid stocks in small and medium cities 3 A lack of specialized training among health professionals in small and medium cities on the issues of palliative care and psychoactive substance use disorders 4 Stigma surrounding opioids and the people who use them Analyzing the enjoyment of the right to health among these two groups of people would seem ill advised for what could they and the health care they receive possibly have in common However this book argues that someone facing the end of life and someone with a heroin use disorder actually face similar challenges they are both in need of the same controlled substances they both require interdisciplinary treatment that extends beyond opioids they both seek health services during moments of extreme vulnerability and they are both often treated negligently by health systems that are ill
