The G20 and the Future of International Economic Governance Mike Callaghan,Tristram Sainsbury,2015-10-01 The G20 needs to be bold and pragmatic if it is to deal effectively with the global economy s big issues Since its establishment in 1999 the G20 has become a key international forum But it suffers from inherent design flaws and remains a work in progress

When Australia began its presidency of the 2014 summit in Brisbane many commentators suggested that Australia's chairing of the G20 would reinvigorate it. This timely book looks at what was achieved at the Brisbane Summit and what has happened in its wake. Crucially it explores what role the G20 could and should play in dealing with such pressing global issues as international taxation, trade, energy and climate change. Expert contributors, many of them former inside players, assess the impact of the summit in the context of the year's broader geopolitical challenges including Russia's temporary expulsion from the G8 and the failure of the US to ratify its governance reforms to the IMF. Taking stock, contributors question the effectiveness of the G20 and identify the reforms that are needed if it is to offer strong leadership in an integrated global economy. Together they ask what is the future of the G20 and other Gs.

Milestones in Green Transition and Climate Compatible Development in Eastern and Southern Africa E. Mukuna, A. Shisanya, 2015-12-29 It is widely recognised that climate change poses significant serious threats to sustained economic growth and agricultural development, poverty reduction, food security and political stability globally. Nowhere are these challenges more marked than in Africa where two thirds of all available land is classified either as desert or dry land in relation to which the Intergovernmental Panel on Climate Change (IPCC) 2013 has classified the continent as the most vulnerable to climate change variability. This anthology is a product of a call from OSSREA to collate evidence based researches in a book in a bid to assess how far countries in eastern and southern Africa are implementing the UNFCCC Rio 20 Agenda 21 and other global and Africa wide decisions concerning the need to address climate change. This will contribute to post 2015 development agenda for sustainable development goals (SDGs) in which climate change and disaster risk reduction will be priority areas of focus. We hope this book will serve as a valuable tool for experts, advisers and policymakers in pursuing effective green growth policies and practices and achieving climate compatible development and in doing so inspire readers to choose a more sustainable pathway for humanity. It will also help in looking at climate change as both a challenge and opportunity for development. Further, this book aims at stimulating more research in climate compatible development and climate financing which have put most countries at crossroads.
