web level 3 59 two plane mirrors are connected at their sides so that they form a 45° angle between them a light ray strikes one mirror at an angle of 30° to the normal and then reflects off the second mirror calculate the angle of reflection of the light ray off the second mirror reflection from the first mirror is $r_1 = 30^\circ$

web 2 days ago reflection is one of the distinctive properties of light it is the reflection of light which enables us to see anything light reflection occurs when a ray of light meets a smooth polished surface and reflects back the incident light ray is said to be reflected off the surface when it lands on it the beam that rebounds is known as the
