terms of labour market deregulation In this context a set of crucial questions arise can enforcing labour market flexibility in itself provide the required impetus for a nation s industrial growth Is the Chinese success in becoming the major destination for foreign direct investments FDIs a consequence of a flexible labour regime or is there some other concealed strength to be found in Chinese labour market institutions In particular it needs to be noted that after double digit growth for more than 25 consecutive years China has recognised some of the fallacy of its development path and in 2008 adopted fairly stringent labour laws which now regulate its labour market This Chinese trajectory perhaps has lessons for India and other countries that are still struggling on the liberal path In particular the Chinese example helps put the Indian field studies in perspective and provides insights into India specific policy recommendations that could also be useful for the developing world The book concludes with the observation that where production entails long term relationships the interests of both the employer and the workers need to be maintained sustainably As the title suggests the book provides takeaways not only for academics and researchers working in this field but also for lawyers consultants politicians bureaucrats and policymakers

Enterprise Information Systems and Implementing IT Infrastructures: Challenges and Issues Parthasarathy, S.,2010-03-31 This book aims at identifying potential research problems and issues in the EIS such as Enterprise Resource Planning ERP Supply Chain Management SCM and Customer Relationship Management CRM Provided by publisher

AGRICULTURE For Self-Sustained Rural Development VISION 2025 Dr. K. P. Agrawal,2022-06-01 The book covers different issues in agriculture The author has pooled the knowledge of many experts and practitioners in the field of agriculture and allied sectors The main Aims and Objectives covered in the book are 1 Enhance Production and Productivity for food and nutritional security 2 Improve profitability through agro processing and value addition and 3 Sustainability through training skill development entrepreneurship and communication Stagnation in productivity shrinking farm size inadequate market infrastructure including warehousing and cold storage and erosion of the foundations of sustainable agriculture such as soil and gene erosion water logging drop in ground water table and decline in surface irrigation are the areas that need urgent attention There is need to pay attention to rural non farm enterprises All these issues in depth have been covered under 40 chapters in the book I am confident that the book would be of immense help to farmers field officials students and many others who directly or indirectly involved with agriculture and rural development
