Sustainable Food Systems from Agriculture to Industry Charis M. Galanakis, 2018-01-02

Sustainable Food Systems from Agriculture to Industry: Improving Production and Processing addresses the principle that food supply needs of the present must be met without compromising the ability of future generations to meet their needs. Responding to sustainability goals requires maximum utilization of all raw materials produced and integration of activities throughout all production to consumption stages. This book covers production stage activities to reduce postharvest losses and increase use of by-products, streams, waste food manufacturing, and beyond, presenting insights to ensure energy, water, and other resources are used efficiently and environmental impacts are minimized. The book presents the latest research and advancements in efficient, cost-effective, and environmentally friendly food production and ways they can be implemented within the food industry. Filling the knowledge gap between understanding and applying these advancements, this team of expert authors from around the globe offer both academic and industry perspectives and a real-world view of the challenges and potential solutions that exist for feeding the world in the future. The book will guide industry professionals and researchers in ways to improve the efficiency and sustainability of food systems. Addresses why food waste recovery improves sustainability of food systems, how these issues can be adapted by the food industry, and the role of policy making in ensuring sustainable food production. Describes in detail the latest understanding of food processing, food production, and waste reduction issues. Includes emerging topics such as sustainable organic food production and computer-aided process engineering. Analyzes the potential and sustainability of already commercialized processes and products.

Reliable Software Technologies - Ada-Europe '98 Lars Asplund, 1998-05-20

This book presents the refereed proceedings of the 1998 Ada Europe International Conference on Reliable Software Technologies. Ada Europe 98 held in Uppsala, Sweden, in June 1998. The 23 revised full papers presented together with two invited contributions were carefully selected by the program committee. The papers address all current aspects of the Ada programming language; they are organized in sections on Ada 95 and Java. Ada 95 language and tools, distributed systems, real-time systems, case studies and experiments, software quality, software development, software architectures, and high-integrity systems.
