Hallmark Oliver Popplewell,2009-04-22 Sir Oliver Popplewell became in his own words officially judicially senile after a distinguished career at the Bar as a High court judge specialising in defamation arbitration and sports law an appropriate niche for a Cambridge cricket Blue And in public life he achieved prominence as chairman of important public enquiries such as the Bradford Stadium disaster *Hallmark A Judge's Life at Oxford* the sequel to his acclaimed autobiography *Benchmark Life Laughter and the Law* tells how he went to Oxford University to read Philosophy Politics and Economics as the oldest undergraduate ever to be admitted with considerable press and media coverage and good natured amusement among family and friends Here is a sharply observed sympathetic yet critical picture of modern Oxford seen from the perspective of a leading judge and public figure who could contrast this experience with his Cambridge days from the late 1940s But this is much more than the story of an older student It is hugely entertaining account of a life lived to the full Sir Oliver takes his readers into his confidence shares his experience and presents a unique facet of a fascinating life which can serve as a warm but sharply observed social and cultural history of modern Britain

Conceptual Maths Peter Mattock,2023-04-05 Written by Peter Mattock *Conceptual Maths* Teaching about rather than just how to do mathematics in schools aims to empower teachers to support students on a comprehensive and coherent journey through school mathematics Showcasing the best models metaphors and representations it provides excellent examples explanations and exercises that can be used across the curriculum Concepts are at the heart of the study of mathematics They are the ideas that remain constant whenever they are encountered but which combine and build upon each other to create the mathematical universe It is the structure of each concept that gives rise to the procedures that are used in calculation and problem solving and by learning about these structures a learner can make sense of how different processes work and use them flexibly as need demands In his first book *Visible Maths* Peter Mattock focused on the use of representations and manipulatives as images and tools and how this can provide a window into some of these mathematical structures His aim in *Conceptual Maths* is to go deeper beyond the procedures and to shed greater light on the structures of the subject's different concepts The book explores how a variety of visual tools and techniques can be used in the classroom to deepen pupils understanding of mathematical structures concepts and operations including number addition and subtraction multiplication and multiples division and factors proportionality functionality measures accuracy probability shape and transformation and vectors among many others In so doing Peter equips teachers with the confidence and practical know how to help learners assimilate knowledge of mathematical concepts into their schema and take their learning to the next level Containing numerous full colour diagrams and models to illustrate the conceptual takeaways and teaching techniques discussed *Conceptual Maths* also includes a glossary covering the key mathematical terms Suitable for teachers of
