Launching of Duke University, 1924-1949 Robert Franklin Durden,1993 In this rich and authoritative history distinguished historian Robert F Durden tells the story of the formation of Duke University beginning with its creation in 1924 as a new institution organized around Trinity College As Durden reveals this narrative belongs first and foremost to Duke University s original President William Preston Few whose visionary leadership successfully launched the building of the first voluntarily supported research university in the South In focusing on Duke University s most formative and critical years its first quarter century Durden commemorates Few s remarkable successes while recognizing the painful realities and uncertainties of a young institution Made possible by a gift from James B Duke the wealthiest member of the family that had underwritten Trinity College since 1890 Duke University was organized with Few as president Few s goal was to turn Duke into a world class institution of higher education and these early years saw the development of much of what we know as Duke University today Drawing on extensive archival material culled over a ten year period Durden discusses the building of the Medical Center the rebuilding of the School of Law the acquisition of the Duke Forest and development of the School of Forestry the nurturing of the Divinity School and the enrichment of the Graduate School of Arts and Sciences It was also during this period as Durden details that such treasures as the Sarah P Duke Gardens were created as well as some near treasures as seen by the failed attempt to start an art museum Although the story of the birth of this University belongs largely to William Preston Few other people figure prominently and are discussed at length Alice Baldwin who led in the

establishment of the Woman's College emerges as a fascinating figure as do William H Wannamaker James B Duke William Hanes Ackland Robert L Flowers Justin Miller and Wilburt Cornell Davison among others Although impressive growth occurred in Duke's formative years tensions also arose The need to strike an institutional balance between the twin demands of teaching and research of regional versus national status combined with continual shortages of funds created occasional obstacles The problem of two sets of trustees one for the university and another for the Duke Endowment loomed largest of all As Few himself said during these early years Duke successfully embarked on a long journey for it was not until after World War II that Duke University consolidated the growth begun in the inter war years An important contribution to the history of Southern higher education as well as to Duke University this book will be of great interest to historians alumni and friends of Duke University alike **Research Memorandum** ,1947 **Bedingfeld papers, &c. Office ,1997 **Systems, Experts, and Computers** Agatha C. Hughes,Thomas Parke Hughes,2011-01-21 This groundbreaking book charts the origins and spread of the systems movement After World War II a systems approach to solving complex problems and managing complex systems came into vogue among engineers scientists and managers fostered in part by the diffusion of digital computing power Enthusiasm for the approach peaked during the Johnson

administration when it was applied to everything from military command and control systems to poverty in American cities. Although its failure in the social sphere coupled with increasing skepticism about the role of technology and experts in American society led to a retrenchment, systems methods are still part of modern managerial practice. This groundbreaking book charts the origins and spread of the systems movement. It describes the major players including RAND, MITRE, Ramo Wooldridge, later TRW, and the International Institute of Applied Systems Analysis and examines applications in a wide variety of military, government, civil, and engineering settings. The book is international in scope, describing the spread of systems thinking in France and Sweden. The story it tells helps to explain engineering thought and managerial practice during the last sixty years.
