Imagine a classroom where all students are engaged in highly rigorous and fun learning every single day That classroom can be yours starting tomorrow You don't have to be a reading specialist to pick up this book Anyone who wants to dramatically improve reading achievement will find helpful suggestions You might be a third grade teacher whose students have mastered decoding and you are ready to build their comprehension Or you might be a high school science teacher whose students aren't yet reading on level with deep critical thinking This book is for you It doesn't matter whether you are a public charter private or alternative education teacher the Reading Without Limits program works in each one Along with hundreds of

ready to use teaching strategies Reading Without Limits comes with a supplemental website where teachers can download even more resources for free Reading Without Limits is the first book offered in the KIPP Educator Series KIPP or the Knowledge is Power Program began in 1994 As of Fall 2012 there are 125 KIPP schools in 20 states and the District of Columbia serving nearly 40 000 students climbing the mountain to and through college Catalogue of the Officers and Students of Howard University, District of Columbia Howard University,1900 21st Century Literacy Renita Schmidt,Paul Lee Thomas,2008-11-09 Renita Schmidt and P L Thomas The guiding mission of the teacher education program in the university where we teach is to create teachers who are scholars and leaders While the intent of that mission is basically sound in theory we instill the idea that teachers at all levels are professionals always learning and growing in knowledge that theory that philosophical underpinning does not insure that the students who complete our program are confident about the act or performance of teaching In our unique program students work closely with one teacher and classroom for the entire senior year and then are supervised and mentored during their first semester of teaching the program is heavily field based and it depends on the effectiveness of mentoring throughout the methods coursework and the first semester of full time teaching Students tell us this guidance and support is invaluable and yet we feel the disjuncture between university and school just as many of you in more traditional student teaching settings Students hear best practice information from us in methods classes and they receive ample exposure to the research supporting our field but have a hard time implementing research based practices in their cla room settings and an even harder time finding it in the classrooms around them
