Review of Marketing 1981 Ben M. Enis, Kenneth J. Roering, 2012-03-15 **Islamic Microfinance** Hussain Mohi ud Din Qadri, Hassnain Ali, 2024-05-20. Islamic microfinance is one of the most important sectors of Islamic social finance which plays a very important role in curbing poverty and improving the standard of living, per capita income, employment level as well as achieving Maqasid al Shariah, profitability and sustainability. This role of Islamic microfinance has become more crucial in the pandemic period. It has been clearly witnessed in developing countries such as Pakistan and Bangladesh how Islamic microfinance institutions helped deprived and affected communities during the pandemic. Another important development during the pandemic was the introduction of blended models of Islamic microfinance such as waqf based Islamic microfinance, a zakat based model and the combination of Islamic commercial and social finance. Islamic microfinance institutions also aim to harness the power of digitalization and fintech, but they need to consider the necessary success factors to realize and gain the real benefits of technology. There are some major challenges related to regulations, management issues, lack of skilled human resources, a wide digital divide and low level of financial literacy in developing countries. These challenges need to be addressed to ensure stability, steady growth and sustainability in the sector. This book is a compendium on Islamic microfinance including case studies from seven jurisdictions and prospects for the sector. The book will be a major contribution to the literature of Islamic economics and finance and a guide of equal importance for students, academics, institutions, regulators, fintechs, policy makers and the general public. **Riskwork** Michael Power, 2016-09-09. This collection of essays deals with the situated management of risk in a wide variety of organizational settings: aviation, mental health, railway, project management, energy, toy manufacture, financial services, chemicals, regulation.

and NGOs Each chapter connects the analysis of risk studies with critical themes in organization studies more generally based on access to and observations of actors in the field The emphasis in these contributions is upon the variety of ways in which organizational actors in combination with a range of material technologies and artefacts such as safety reporting systems risk maps and key risk indicators accomplish and make sense of the normal work of managing risk riskwork In contrast to a preoccupation with disasters and accidents after the event the volume as whole is focused on the situationally specific character of routine risk management work It emerges that this riskwork is highly varied entangled with material artefacts which represent and construct risks and importantly is not confined to formal risk management departments or personnel Each chapter suggests that the distributed nature of this riskwork lives uneasily with formalized risk management protocols and accountability requirements In addition riskwork as an organizational process makes contested issues of identity and values readily visible These back stage back office encounters with risk are revealed as being as much emotional as they are rationally calculative Overall the collection combines constructivist sensibilities about risk objects with a micro sociological orientation to the study of organizations
