ADRP 7-0 The Army's operations process is the foundation for how leaders conduct unit training. It also places the commander firmly at the center of the process and as the lead of every facet of unit training. FM 7-0 supports the idea that training a unit does not fundamentally differ from preparing a unit for an operation. Reinforcing the concepts, ideas, and terminology of the operations process while training as a unit makes a more seamless transition from training to operations. This publication focuses on training leaders, Soldiers, and Army Civilians as effectively and efficiently as possible given limitations in time and resources. It also aims to ensure that leaders incorporate ethical aspects such as moral, ethical decision points, and personal actions into training scenarios or routinely discuss ethics during post-training after-action reviews. FM 7-0 guides leaders to develop realistic training which includes changing conditions and various operating environments.
