

FACE-TO- FACE ENCOUNTER

_____/_____/_____
PATIENT NAME Date of Birth

I certify the above patient is under my care and that I, or a nurse practitioner or physician's assistant working with me, had a face-to-face encounter that meets the physician face-to-face encounter below requirements with this patient on:

_____/_____/_____* Date of Face-to-Face Encounter (*has to occur no more than 90
Month Date Year days prior to home health start of care date or within 30 days of
the start of home health care)

Medical condition requiring Face-to-Face Encounter, which is primary reason for home health care referral:

List medical condition requiring Face-to-Face Encounter and Reason for Home Care

I certify, based on my findings, the following services are medically necessary home health services (Check all that apply):

_____Nursing
_____Physical Therapy
_____Speech language pathology

My clinical findings support the need for the above services because:

Further, I certify that my clinical findings support that this patient is homebound (i.e. absences from home require considerable and taxing effort and are for medical reasons or religious services or infrequently or of short duration when for other reasons) because:

Physician Signature_____

Date of Signature_____/_____/_____

Physician Printed Name_____

Face-to-Face Encounter is a requirement for Medicare Beneficiaries receiving Home Health. Form must be completed in entirety to meet Medicare Regulations and allow our agency to bill for home care services.

Face To Face Examples For Home Health

Kelly A. Goudreau, Mary C. Smolenski

Face To Face Examples For Home Health:

Geriatric Home-Based Medical Care Jennifer L. Hayashi, Bruce Leff, 2015-12-09 This book is a practical reference for any clinician who has struggled to care for an older adult in a home setting The volume is written by experts in the field who describe fundamental principles and clinical approaches of geriatric home based care and their application to specific diseases and conditions including delirium incontinence falls and chronic pain and disability The book also details house calls for special populations from the developmentally disabled to those afflicted with neurologic or psychiatric diseases The volume explores house calls within the context of the US healthcare system *Geriatric Home Based Medical Care Principles and Practice* is a valuable resource for geriatricians geriatric nurses primary care physicians social workers public health officials and all medical professions who need tools to provide timely compassionate and high quality care for their older adult patients

Home Healthcare Services and Technology Implications Çapar, Haşim, Çakmak, Mehmet Aziz, 2025-08-12 As global populations age and healthcare demands shift home healthcare is emerging as a vital model for delivering personalized cost effective care Technological innovations are transforming how these services are designed managed and delivered This transformation enhances the efficiency accessibility and responsiveness of care especially in dispersed or high need regions At the same time integrating advanced technologies raises critical considerations around equity workforce development and sustainable implementation Addressing these dynamics is essential to shaping a resilient inclusive and future ready healthcare system that meets evolving societal needs *Home Healthcare Services and Technology Implications* explores the relationship between the development of home healthcare services and technological innovation in the field addressing technological change and transformation of the new world changes in population structure and related health needs Additionally it focuses on how artificial intelligence and new algorithms will shape the growing expectations of healthcare services Covering topics such as artificial intelligence people with disabilities and user interfaces this book is an excellent resource for academicians researchers marketing professionals human resources and training professionals health ministers hospital managers educators and more

Ethical Issues in Home Health Care Sheri Smith, Rosalind Ekman Ladd, Lynn Pasquerella, 2008 This book will help to answer some of the growing number of ethical questions and more complex issues that home health care nurses face The cases presented in each chapter of the book are fictionalized situations based on interviews conducted with home health care nurses in both hospital sponsored and private agencies in hospices and in urban and rural settings Each chapter of the book is devoted to one of the main areas of concern for home health care nurses Focusing on specific cases it offers analysis and discussion of the ethical issues cites legal requirements where relevant and s

Home Care Nursing Practice Robyn Rice, 2006-01-01 This text covers conceptual information leadership skills and current issues and trends It provides clear and concise information about the best practices and quality improvement for the most common clinical conditions seen in home care Cover

Geriatric Home-Based Medical Care

Jessica L. Colburn, Bruce Leff, Mariah L. Robertson, Mattan Schuchman, 2024-11-25 Older adults are living longer with more chronic disease and functional impairment than at any other time in history. Office-based practice is inadequate to meet the needs of patients who have difficulty leaving their homes for routine or urgent visits, and health care clinicians must choose between trying to manage their problems via telehealth or sending them to the emergency room via ambulance. Indeed, many clinicians receive little or no training in home-based medical care and are unable to consider a home visit that might avert a health crisis or an emergency room visit. Other clinicians know that house calls are possible but may not know how to work them into day-to-day practice. In recent years, a growing number of clinicians have focused their practice on home-based medical care to meet the rising need. In fact, there has been a substantial increase in house calls provided to Medicare beneficiaries. In 2023, over 750,000 traditional Medicare beneficiaries and in 2022, over 680,000 Medicare Advantage beneficiaries received longitudinal home-based medical care. While the number of house calls has increased rapidly, the number of clinicians providing those visits has markedly decreased, suggesting that clinicians who are providing such care are making it the sole focus of their practice. This book is intended to be a practical reference for any clinician who has struggled to care for an older adult who has difficulty getting to the office. By describing fundamental principles of geriatric house call medicine and application to specific diseases and conditions, we hope to provide clinicians with the tools they need to provide timely, compassionate, and high-quality care for their older adult patients. The second edition has been updated to reflect changes in the healthcare system and approaches to care since the publication of the first edition. *Health Policy and Advanced Practice Nursing, Second Edition* Kelly A. Goudreau, Mary C. Smolenski, 2017-12-28 Praise for the First Edition There are many policy books, but none are written by APRNs or focus just on APRN practice. APRNs are at the core or can be if they use their practice knowledge and education to shape policy. The editors eloquently make the case that policy formation is a critical nursing skill. Doody's Medical Reviews The only book of its kind, this text offers a wealth of information about the role of all types of APRNs: NPs, CNSs, CNMs, and CRNAs in influencing the development and application of health care policy in a wide range of specialties. Featuring nine completely new chapters, the second edition delivers an invigorated focus on developing policy that advocates for vulnerable populations and discusses how the incorporation of interprofessional education has changed and will continue to alter health policy in the U.S. and internationally. The text also discusses the evolving influence of the Patient Protection and Affordable Care Act (PPACA) and the implications of current and future health policy changes that will be impacting the practice of various APRN roles. Authored by APRN luminaries who have been closely involved with health policy development, the text meets the requirements of the IOM report on The Future of Nursing and the DNP criteria V for the inclusion of health policy and advocacy in the curriculum. This call to action for APRNs is specifically designed for courses enrolling students from a variety of APRN trajectories and includes content from all APRN role perspectives in every section. New to the Second Edition Emphasizes policy development advocating for vulnerable

populations Discusses the current and future influence of interprofessional education on health policy in the U S and worldwide Addresses how health policy changes will impact the various APRN roles Includes nine new chapters on Health Policy and its Effect on Large Systems Value Based Purchasing Health Care Reform and Independent Practice Health Policy Implications Regarding Substance Abuse PTSD Treatment Genetics Competency Issues and The International Council of Nurses Key Features Addresses role specific policy needs of all four APRN roles and DNPs Encompasses all requisite information about health care policy and reform in the U S and worldwide and its impact on advanced practice nursing Meets the requirements of IOM s The Future of Nursing and DNP criteria V Explains how and why APRNs can and should influence policy development Discusses implications of not participating in health policy decisions **Federal Register** ,2013-07

Current Diagnosis and Treatment: Geriatrics 2E Brie Williams,Anna Chang,C.
