

## Field Goals, Balls, and Nets

---

**Reporting Category** Number and Number Sense

**Topic** Using ratios to compare quantities

**Primary SOL** 6.1 The student will describe and compare data, using ratios, and will use appropriate notations, such as  $\frac{a}{b}$ ,  $a$  to  $b$ , and  $a:b$ .

**Related SOL** 6.2a

**Materials**

- Field Goals, Balls, and Nets graphic organizer (attached)

**Vocabulary**

*compare, fractions, decimals (earlier grades)*

*ratio (6.1, 6.2)*

**Student/Teacher Actions (what students and teachers should be doing to facilitate learning)**

1. Begin the lesson by asking students for the definition of the word *ratio*. Make sure they understand that a ratio is a comparison of any two quantities and that it is used to represent a relationship within or between sets. Emphasize that the two quantities in a ratio must be ordered in the same order as the quantities in the relationship.
2. Distribute copies of the Field Goals, Balls, and Nets graphic organizer, and have students write the definition of *ratio* in their own words in the center oval. Direct students to write the four types of ratios in the four surrounding ovals and explain each comparison, as follows:
  - Part-Whole: Compares a part of a set to the entire set
  - Part-Part: Compares a part of a set to another part of the same set
  - Part-Part: Compares a part of one set to a part of another set
  - Whole-Whole: Compares a complete set to another complete set
3. Have students look at the given statistics from the National Basketball Association (NBA) and National Football League (NFL). Explain that in order to understand each type of ratio fully, students will use the data in this chart to create ratios to represent various relationships. Model how to do this by choosing a specific ratio (e.g., the ratio of NBA home games to regular season games—a Part-Whole ratio), and demonstrate how to write this ratio in each notation. Then, lead the class in developing one ratio for each of the other three types.
4. Have students work independently to write an additional ratio for each of the four types, using the data in the chart. (Note: Student answers will vary due to the large amount of data provided and multiple interpretations of the data.)
5. Have selected students share and explain their ratios, defining all aspects of each.
