abundance of findings related to them has accumulated in basic research and clinical medicine. However, the vast majority of biological features is still masked in mystery. Furthermore, a strategy of treatment and prevention has not yet been established for most human herpesviruses. A wide range of readers will be interested in this volume with its treatment of problematic points and latest findings in the field.

Perspectives on Research with H5N1 Avian Influenza National Research Council, Institute of Medicine, Division on Earth and Life Studies, Committee on Science, Technology, and Law, Board on Global Health, Board on Life Sciences, Policy and Global Affairs, Forum on Microbial Threats, 2013-05-04. When in late 2011 it became public knowledge that two research groups had submitted for publication manuscripts that reported on their work on mammalian transmissibility of a lethal H5N1 avian influenza strain, the information caused an international debate about the appropriateness and communication of the researchers' work, the risks associated with the work, partial or complete censorship of scientific publications, and dual use research of concern in general. Recognizing that the H5N1 research is only the most recent scientific activity subject to widespread attention due to safety and security concerns, on May 1, 2012, the National Research Council's Committee on Science, Technology, and Law, in conjunction with the Board on Life Sciences and the Institute of Medicine's Forum on Microbial Threats, convened a one-day public workshop for the purposes of 1) discussing the H5N1 controversy, 2) considering responses by the National Institute of Allergy and Infectious Diseases (NIAID) which had funded this research, the World Health Organization, the U.S. National Science Advisory Board for Biosecurity (NSABB), scientific publishers, and members of the international research community, and 3) providing a forum wherein the concerns and interests of the broader community of stakeholders, including policy makers, biosafety and biosecurity experts, non-governmental organizations, international organizations, and the general public, might be articulated. *Perspectives on Research with H5N1 Avian Influenza: Scientific Enquiry, Communication, Controversy* summarizes the proceedings of the workshop.
