Household Politics Don Herzog, 2013-04-16 DIVDIVEarly modern English canonical sources and sermons often urge the subordination of women In Household Politics Don Herzog argues that these sources were blather not that they were irrelevant but that plenty of people rolled their eyes at them Indeed many held that a man had to be an idiot or a buffoon to try to act on their hoary wisdom Households didn't bask serenely in naturalized or essentialized patriarchy Instead husbands wives and servants struggled endlessly over authority Nor did some insidiously gendered public private distinction make the political subordination of women invisible Conflict Herzog argues doesn't corrode social order it's what social order usually consists in He uses the argument to impeach conservatives and their radical critics for sharing confused alternatives The social world Herzog brings vibrantly alive is much richer and much pricklier than many imagine div div

Writing for the Real World Ann Marie Radaskiewicz, 2002 *The Future of Normativity*, 2025-01-27 The past few decades have witnessed an intense focus on the notion of normativity We orientate ourselves to think about normativity by asking a range of questions There are ways we act and think and ways in which the world is But as well as what there is and what we do what should or ought we to do What reasons are there for acting and thinking What values do certain ways of being have What authority is had by the norms and standards that govern our behaviour and thought At the heart of these debates are other questions How should we characterize normative notions such as reason and value What are the relations between them Are they all properly normative *The Future of Normativity* brings together work by a set of leading philosophers to consider what normative thought could and should be These questions gain additional colour and point by being considered within different areas of our lives such as the areas concerned with ethics aesthetics and epistemology Further issues then come to the fore Reasons and obligations in some areas seem to have more authority than in others but why and how Is there a unity of normativity across different areas This volume therefore considers familiar questions afresh while also introducing

new questions and topics all of which bear on the future of normativity
