According to the reports of BusinessWire (2020), the global market for Fibre Optics will attain a growth of USD 3.3 billion, which will be driven by 9.5% of compounded growth. Based on its global investigations, this report further predicted that by 2025, the fibre optics market will grow at a rate of 8.5% which will yield an approximate return of USD 7.25 billion.

This tremendous growth is the reason that irrespective of immediate return, an investment in research on fibre optics stands absolutely a profitable decision.

Writing Human Factors Research Papers Don Harris, 2016-12-05 Writing high quality papers suitable for publication within international scientific journals is now an essential skill for all early career researchers their career progression and the reputation of the department in which they work depends upon it However many manuscripts are rejected or sent back for major re working not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented It is one thing to write a good scientific paper however it is quite another thing to get it published This requires some additional nous In writing this book Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor By his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn't The material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error The text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers The author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful All major points are illustrated with examples from his own published works The book is written in the form of a manual for constructing a journal manuscript read a chapter write a section However the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments Each chapter concludes with a checklist to ensure all the key elements have been addressed

Supervised Machine Learning for Science Christoph Molnar, Timo Freiesleben, 2024-10-31 Machine learning has revolutionized science from folding proteins and predicting tornadoes to studying human nature While science has always had an intimate relationship with prediction machine learning amplified this focus But can this hyper focus on prediction be justified Can a machine learning model be part of a scientific model Or are we on the wrong track In this book we explore and justify supervised machine learning in science However a naive application of supervised learning won't get you far because machine learning in raw form is unsuitable for science After all it lacks interpretability causality uncertainty quantification and many more desirable attributes Yet we already have all the puzzle pieces needed to improve machine learning from incorporating domain knowledge to creating robust interpretable and causal models The problem is that the solutions are scattered everywhere In this book we bring together

the philosophical justification and the solutions that make supervised machine learning a powerful tool for science The book consists of two parts Part 1 justifies the use of machine learning in science Part 2 discusses how to integrate machine learning into science Writing To Reason Brian David Mogck,2008-03-17 Writing to Reason presents the principles of writing a clear and well argued philosophy paper in an easily referenced numerical format which facilitates efficient grading and clearer communication between instructors and students Points out the most common problems students have achieving these objectives Increases efficiencies for instructors in grading papers Presents students with clearer information objectivity and transparency about their graded results Facilitates clearer communication between instructors and students

needed alternative to the more traditional texts used to teach writing instruction Grounded in history the book clarifies changing theoretical and practical approaches to teaching writing critically assessing each approach in relation to the social and political movements of the day both within and beyond the university The author takes us inside the real world of writing instruction not only from the viewpoint of instructor but as seen through the eyes of students struggling to make sense of the expectations of writing class Mitchell emphasizes that writing entails far more than putting words to paper and delves into contextually variable culturally defined expectations that include multiple linguistic forms both oral and written highlighting the complexity of writing s while engaging the reader in lively academic debates about language and society *A Principled*

Approach to Abuse of Dominance in European Competition Law Liza Lovdahl Gormsen, 2010-03-04 Three questions surround the interpretation and application of Article 82 of the EC Treaty What is its underlying purpose Is it necessary to demonstrate actual or likely anticompetitive effects on the market place when applying Article 82 And how can dominant undertakings defend themselves against a finding of abuse Instead of the usual discussion of objectives Liza Lovdahl Gormsen questions whether the Commission's chosen objective of consumer welfare is legitimate While many Community lawyers would readily accept and indeed welcome the objective of consumer welfare this is not supported by case law The Community Courts do not always favour consumer welfare at the expense of economic freedom This is important for dominant undertakings ability to advance efficiencies and for understanding why the Chicago and post Chicago School arguments cannot be injected into Article 82

Contextualising Knowledge Jonathan Jenkins Ichikawa, 2017-06-16 Jonathan Ichikawa develops a contextualist semantics for knowledge ascriptions and shows how it can illuminate foundational questions in epistemology He argues that in thinking clearly about knowledge epistemologists must also think about the dynamic aspects of the words we use to talk about knowledge Contextualising Knowledge defends a central theoretical role for knowledge in broader theorising evidence belief justification and assertion are all explained in part in terms of knowledge but none of these connections can properly be understood or appreciated independently from the contextualist approach to knowledge ascriptions The book synthesizes two of the biggest ideas in contemporary epistemology contextualism about knowledge ascriptions and the knowledge first emphasis on the theoretical primacy of knowledge Ichikawa argues that the apparent tension between these ideas can be resolved indeed a central theme of the book is that each has something important to offer the other Ichikawa embraces contextualism emphasizing careful attention to its epistemic assumptions and implications The result is a novel take on central questions about knowledge and its roles in human life and discourse
