doctora por la Universidad Politécnica de Cataluña **Le Corbusier, Sert y Wiener** Doris Tarchópulos, 2022-03-31 Este libro reivindica las figuras de Le Corbusier Josep Lluís Sert y Paul Lester Wiener en los planes de construcción de la ciudad de Bogotá. El impacto que tuvieron estos arquitectos en el desarrollo y en la implantación de paradigmas sociales y urbanísticos de la ciudad no es menor a pesar de lo que se ha creído en la academia del país. Acompañado de un rico material gráfico este libro plantea un detallado análisis del panorama histórico de dos episodios especialmente significativos en la construcción de ciudad y en las ideas de desarrollo derivadas de estos planes: Piloto y Regulador 1949-1953. Estos proyectos delimitaron la zonificación urbana en Bogotá, el sistema vial, los reglamentos de construcción, la planificación de la vivienda pública entre otros elementos. Así el lector encontrará en este libro cuidadosamente editado una amplia documentación de estos planes urbanos que se recupera con un serio trabajo de archivo y con la búsqueda rigurosa de Doris Tarchópulos. Le Corbusier y Sudamérica Fernando Pérez Oyarzún, 1991 El proceso creativo Alberto Dallal, 2006 Papers presented during the 26th edition of the International Colloquium of Art History an event focused on the study of the creative activity in architecture and art from the creator's point of view analyzing the artists their influences and development the external elements that intervene in the creation of art and ultimately in the understanding of the creative process Semiótica narrativa del espacio arquitectónico Bruno Chuk, 2005 International Design Organizations Jeremy Aynsley, Alison J. Clarke, Tania Messell, 2022-01-13 This innovative volume brings together international design scholars to address the history and present day status of national and international design organizations working across design disciplines and located in countries including Argentina Turkey Estonia Switzerland Italy China and the USA. In the second half of the 20th century many non governmental organizations were created to address urgent cultural economic and welfare issues. Design organizations set out to create an international consensus for the future direction of design. This included enhancing communication between professionals educators and practitioners raising standards for design and creating communities of designers across linguistic national and political borders. Shared needs and agendas were identified and categories of design constantly defined and re defined often with overt cultural and political intents. Drawing on an impressive range of original research archival sources and oral testimony this volume questions the aims and achievements of national and international design organizations in light of their subsequent histories and their global remit. The Cold War period is central to the book while many chapters draw on post colonial perspectives to interpret how transnational networks and negotiations took place at events and congresses and through publication. **El sentido de la arquitectura moderna** Helio Piñón, 1998 Rastrear la genealogía de la idea moderna de forma a lo largo de la estética del siglo XIX y analizar el proceso de su desarrollo en la arquitectura del siglo XX es el propósito del programa de doctorado que Helio Piñón dirige en la Escuela Técnica Superior de Arquitectura de Barcelona ETSAB. Este opusculo contiene una descripción somera de los argumentos que centran dicho programa además de la relación de los temas que lo vertebran y la bibliografía básica necesaria para documentar su estudio.

Las ilustraciones evocan el universo visual que se recorre y testifican el empeño visualista que anima el programa de revisión de la modernidad que aquí se aborda
