Cognisance, Motivation, and Emotional Intelligence in Leadership Heiko Filthuth, 2020-04-20 Essay from the year 2019 in the subject Business economics Business Management Corporate Governance grade A language English abstract How does a leader see himself or herself? What does he or she perceive about his or her leadership and leadership abilities? The first part of this work briefly discusses different aspects of leaders' cognisance on leadership in general and their own leadership abilities. Afterwards the author considers three motivations that most directly influence a leader's behaviour, discussing the goals behind them, the resulting behaviour and its influence on the leadership style. The final part of this work starts with brief explanations of Emotional Intelligence in leadership and some of the more common models of the leadership process. From these a model of Integrated Emotional Intelligence (IEI) in the leadership process is developed. Considering the elements of this model, the effects of Emotional Intelligence on leader behaviour and leader communication are explained. The cognisance of leaders on leadership is much influenced by their perception on their own leadership abilities and their motivations. These however may turn out to be quite complex and lacking the consideration of the followers' abilities and motivations. Emotional Intelligence in leadership is one concept to enhance leaders' cognisance in this respect.

Advancing Relational Leadership Research Mary Uhl-Bien,Sonia M. Ospina,2012-10-01 Leaders and followers live in a relational world a world in which leadership occurs in complex webs of relationships and dynamically changing contexts Despite this our theories of leadership are grounded in assumptions of individuality and linear causality If we are to advance understandings of leadership that have more relevance to the world of practice we need to embed issues of relationality into leadership studies This volume addresses this issue by bringing together for the first time a set of prominent scholars from different paradigmatic and disciplinary perspectives to engage in dialogue regarding how to meet the challenges of relationality in leadership research and practice Included are cutting edge thinking heated debate and passionate

perspectives on the issues at hand The chapters reveal the varied and nuanced treatments of relationality that come from authors alternative paradigmatic entity constructionist critical views Dialogue scholars reacting to the chapters engage in spirited debate regarding the commensurability or incommensurability of the paradigmatic approaches The editors bring the dialogue together with introductory and concluding chapters that offer a framework for comparing and situating the competing assumptions and perspectives spanning the relational leadership landscape Using paradigm interplay they unpack assumptions and lay out a roadmap for relational leadership research A key takeaway is that advancing relational leadership research requires multiple paradigmatic perspectives and scholars who are conversant in the assumptions brought by these perspectives The book is aimed at those who feel that much of current leadership thinking is missing the boat in today s complex relational world It provides an essential resource for all leadership scholars and practitioners curious about the nature of research on leadership both those with much research exposure and those new to the field
