book describes how prototyping based on XR technologies including Virtual Augmented and Mixed Reality is a suitable approach for testing ideas and products without fully physically building them The major benefits which are well explained and demonstrated in this book consist in allowing users to experience products including their appearance functions and usability in a digital context that can be easily modified and customized according to the users feedback and the context of use The audience of the book includes graduate students who wish to learn more about prototyping methods and technologies and product and digital application designers who can deepen their knowledge on advanced digital technologies for evaluating the designs of products and experiences
