Introduction to Coordination Chemistry Geoffrey A. Lawrance, 2013-03-15 At the heart of coordination chemistry lies the coordinate bond in its simplest sense arising from donation of a pair of electrons from a donor atom to an empty orbital on a central metalloid or metal Metals overwhelmingly exist as their cations but these are rarely met naked they are clothed in an array of other atoms molecules or ions that involve coordinate covalent bonds hence the name coordination compounds These metal ion complexes are ubiquitous in nature and are central to an array of natural and synthetic reactions Written in a highly readable descriptive and accessible style Introduction to Coordination Chemistry describes properties of coordination compounds such as colour magnetism and reactivity as well as the logic in their assembly and nomenclature It is illustrated with many examples of the importance of coordination chemistry in real life and includes extensive references and a bibliography Introduction to Coordination Chemistry is a comprehensive and insightful discussion of one of the primary fields of study in Inorganic Chemistry for both undergraduate and non specialist readers

Microeconomics Anti-Textbook Rod Hill, Tony Myatt, 2021-12-02. Mainstream textbooks present economics as an objective science free from value judgements. The Microeconomics Anti Textbook demonstrates this to be a myth, one which serves to make such textbooks not only off-puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives. In this fully updated and expanded edition of their celebrated book, Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way before presenting an anti-text analysis and critique. Challenging the assumptions, arguments and models, Hill and Myatt provide the essential guide to decoding the textbooks and show that real economics is far more interesting and subversive than the simplistic version presented to students.
