a. Use this rule to predict the heading distance of a car traveling 10 mph.

200 ft

b. Write an equation for this that represents the car's heading distance when driving at a speed of x miles per hour.

$f(x) = \frac{1}{5}x$

 can understand the great debate taking place in many states in this country about how to teach basic math The debate
 centers around the standards written by the National Council of Teachers of Mathematics NCTM which call for a radically
 different approach to mathematics education Because the issues are so heated between the NCTM oriented curricula and
 traditional curricula the curricula that NCTM oriented replaced the term Math Wars was coined to describe them Parents are
 concerned about their children s math learning Teachers are concerned about math teaching When parents see what
 children are bringing home under the new curriculum it is clear that their children are not working on the same mathematics
 that parents remember from the time when they were in school But the problem goes beyond grades K 12 Post secondary
 mathematics courses are the fear of many students The standards created by the NCTM do not necessarily prepare students
 for success either on SATs or in college Besides lack of knowledge about mathematics education many parents have an
 additional problem in that they feel they lack knowledge in mathematics itself This is very intimidating thus it is difficult for
 parents to do anything about the confusing state of mathematics education This book provides some answers **El-Hi**
