Textbook on water management engineering Wagdy Nazir Dimian, The Anglo Egyptian Bookshop 18-12-2024, Tank Irrigation of Dry Zones in India Sebak Kumar Jana, 2014-01-01 Irrigation plays a vital role in improving the yield or productivity in the agricultural sector and the impact of irrigation on reducing poverty is striking Among the irrigation sources tank irrigation is considered important in the dry zones as it can play a very critical role in the sustainable irrigation development in these areas Tank irrigation has various advantages viz tanks can have a wider geological distribution than large scale projects tank investments tend to be less capital intensive tanks have fewer negative environmental impacts and tanks can provide a variety of livelihood options to the rural people Tank irrigation is getting importance currently in the context of climate change and declining ground water table In spite of these advantages tank

irrigation has declined in almost all states in India over the years Causes of a decline in tank irrigation include weakening community co operation and budget constraints There is an urgent need of policy focus for the development of tank irrigation The present book highlights the problems and prospects of tank irrigation in the zones in West Bengal The study is based on the primary survey carried out on 181 tanks in the three districts of West Bengal The book is an outcome of a research project sponsored by ICSSR New Delhi *First International Symposium on Urban Development: Koya as a Case Study* F. M. Khoshnaw,2013-12-16 This book contains papers presented at the International Symposium on Urban Development held in the Kurdistan region of Iraq organised by the Faculty of Engineering at Koya University The Kurdistan region is rich in oil gas mineral resources and underground water However until recently the political and security issues were such that the region was unable to take advantage of those resources Nowadays Kurdistan is emerging as one of the fastest developing areas in the Middle East with its universities playing a major role in this process The aim of the meeting was to focus the research carried out at academic and government institutions with the needs of Society The International Symposium papers included in this volume cover a wide range of topics and are written by people with different specialisations and perspectives

Research Alok Tiwari,2016-02-24 This book reviews contemporary research on urban infrastructure in 76 Ethiopian cities It examines urban infrastructure issues in these cities and covers a wide range of topics from sustainability and smart cities to research methods employed by urban infrastructure investigators with regard to Ethiopian cities Research on urban infrastructure legitimacies and modalities has established its value worldwide in recent years though it is still fairly young in the Ethiopian context The first chapter outlines ongoing issues of debate concerning urban infrastructures including but not limited to discourses on sustainability smart cities innovative financing methods and potential partnerships Urban infrastructure issues in Ethiopian cities are examined in the second chapter while the third chapter presents a review of the

most relevant literature for researchers Findings show that the citations in the research reports are mainly from the materials available over the internet including WHO UN Habitat and unpublished local materials The fourth chapter identifies patterns in the findings and recommendations of the research reports discussed The results reveal that there is a wider gap between supply and demand with regard to urban infrastructure in Ethiopian cities a situation that is further aggravated because of the growing urban population and already existing backlogs The fifth chapter reviews the essential methods employed by urban infrastructure investigators in Ethiopian cities In this regard the cross sectional study method with the use of survey method has been broadly adopted among investigators Lastly the book presents a summary and recommendations It was observed that the urban infrastructure boom in Ethiopia is primarily concentrated in the key cities and the current pattern of urban infrastructure provision does not incorporate the notion of sustainability Hence the book calls for setting the agenda of future research on urban infrastructure and services in Ethiopian cities together with the universities private sector and government who should ideally collaborate to produce the knowledge needed to improve quality of life welfare productivity and economic growth
