**Information Security Planning** Susan Lincke, 2024-01-16 This book demonstrates how information security requires a deep understanding of an organization's assets, threats, and processes combined with the technology that can best protect organizational security. It provides step-by-step guidance on how to analyze business processes from a security perspective while also introducing security concepts and techniques to develop the requirements and design for security technologies. This interdisciplinary book is intended for business and technology audiences at student or experienced levels. Organizations must first understand the particular threats that an organization may be prone to, including different types of security attacks, social engineering, and fraud incidents, as well as addressing applicable regulation and security standards. This international edition covers Payment Card Industry Data Security Standard (PCI DSS), American security regulation, and European GDPR. Developing a risk profile helps to estimate the potential costs that an organization may be prone to, including how much should be spent on security controls. Security planning then includes designing information security as well as network and physical security, incident response, and metrics. Business continuity considers how a business may respond to the loss of IT service. Optional areas that may be applicable include data privacy, cloud security, zero trust, secure software requirements, and lifecycle governance, introductory forensics, and ethics. This book targets professionals in business IT security, software development, or risk. This text enables computer science, information technology, or business students to implement a case study for an industry of their choosing.

*ICCWS 2015 10th International Conference on Cyber Warfare and Security* Jannie Zaaiman, Louise Leenan, 2015-02-24 These Proceedings are the work of researchers contributing to the 10th International Conference on Cyber Warfare and Security (ICCWS 2015), co-hosted this year by the University of Venda and The Council for Scientific and Industrial Research. The conference is being held at the Kruger National Park, South Africa, on the 24-25 March 2015. The Conference Chair is Dr Jannie Zaaiman from the University of Venda, South Africa, and the Programme Chair is Dr Louise Leenen from the Council for Scientific and Industrial Research, South Africa.

*Security Planning* Susan Lincke, 2015-06-11 This book guides readers through building an IT security plan. Offering a template, it helps readers to prioritize risks, conform to regulation, plan their defense, and secure proprietary confidential information. The process is documented in the supplemental online security workbook. Security Planning is designed for the busy IT practitioner who does not have time to become a security expert but needs a security plan now. It also serves to educate the reader of a broader set of concepts related to the security environment through the Introductory Concepts and Advanced sections. The book serves entry-level cyber security courses through those in advanced security planning. Exercises range from easier questions to the challenging case study. This is the first text with an optional semester-long case study. Students plan security for a doctor's office which must adhere to HIPAA regulation. For software engineering-oriented students, a chapter on secure software development introduces security extensions to UML and use cases with a case study. The text also adopts the NSA's
