Baghdad from the 1960s to the 1990s as well as the couple's travels during this period and their years of exile in Amman and Manama Through vivid descriptions and rarely seen photographs May Muzaffar provides insights into their position in the Arab and international art scenes The book serves as a guide to the archival material that al Mawrid Arab Center for the Study of Art at NYU Abu Dhabi has digitized and made available for researchers creating an expanded space for exploration and understanding of the remarkable work of this generation MAY MUZAFFAR 1940 Baghdad is a poet short story writer art critic and translator Having graduated in English literature from Baghdad University in 1961 she has published seven collections of poetry and five collections of short stories in Baghdad Beirut and Amman She authored books on art and artists and has also edited several books on Rafa Nasiri's art She is the sponsor of Rafa Nasiri's art heritage and organizes an annual award for graphic arts in his name since 2014 Urban Form in the Arab World Stefano Bianca, 2000 **Middle East Sources** Ian Richard Netton, 2013-11-19 Middle East Sources provides an invaluable resource for the busy librarian student or scholar with Middle Eastern interests It aims to guide readers to the major collections of books and other materials on the subject in the UK and Ireland as well as to some lesser known but nonetheless interesting collections in smaller libraries Entries are fully up to date and include information on addresses including telephone fax and e-mail details brief descriptions of collections held along with references to relevant catalogue material and other directories The guide also highlights the extent of collections and gives help in accessing The MELCOM Area Specialisation Scheme MASS designation of the collections is also included where relevant The Alhambra Robert Irwin, 2011-05-26 The Alhambra the red fort on its rocky hill above Granada with its fountained courts and gardens and intricate decoration has long been a byword for exotic and melancholy beauty In a stimulating new book in the Wonders of the World series Robert Irwin Arabist and novelist examines its engrossing and often mysterious history Built by a bloody and threatened dynasty of Muslim Spain the Alhambra was preserved as a monument to the triumph of Christianity Much of what we see is the invention of later generations Its highly sophisticated decoration is not just random but full of hidden meaning Even its purpose palace or theological college is not always clear Its influence on art and on literature orientalist painting and Granada cinemas Washington Irving and Borges has been significant Robert Irwin enables us to understand the Alhambra's history fully The Wonders of the World is a series of books that focuses on some of the world's most famous sites or monuments Their names will be familiar to almost everyone they have achieved iconic stature and are loaded with mythological baggage These monuments have been the subject of many books over the centuries but our aim through the skill and stature of the writers is to get something much more enlightening stimulating even controversial than straightforward histories or guides Studies in Islamic Civilization Ahmed Essa, Othman Ali, Othman Ali, 2010-01-01 Studies in Islamic Civilization draws upon the works of Western scholars to make the case that without the tremendous contribution of the Muslim world there would have been no Renaissance in Europe For almost a thousand years Islam was arguably one of the leading civilizations of the world

spanning a geographic area greater than any other. It eliminated social distinctions between classes and races, made clear that people should enjoy the bounties of the earth provided they did not ignore morals and ethics, and rescued knowledge that would have been lost if not forever, then at least for centuries. The genius of its scholars triggered the intellectual tradition of Europe, and for over seven hundred years its language, Arabic, was the international language of science. Strange then that its legacy lies largely ignored and buried in time. In the words of Aldous Huxley, Great is truth, but still greater from a practical point of view is silence about truth. By simply not mentioning certain subjects, propagandists have influenced opinion much more effectively than they could have by the most eloquent denunciations. *Studies in Islamic Civilization* is a compelling attempt to redress this wrong and restore the historical truths of a golden age that ushered in the Islamic renaissance and, as a by-product, that of the West. In doing so, it gives a bird's-eye view of the achievements of a culture that at its height was considered the model of human progress and development.

The Qur'an and the West Kenneth Cragg, 2016-02-01 Kenneth Cragg (1913-2012) was one of the West's most gifted interpreters of Islam. In this deeply insightful classic work of Qur'anic studies, he argues that the West must put aside a spiritual imperialism that draws on Western precepts alien to Muslims and learn to come within Islam. Only then can a conversation begin that can relieve the misunderstandings and suspicion that has grown between Islam and the West in the years since 9/11. Cragg's close and thoughtful readings are as timely and relevant now as they were when *The Qur'an and the West* was originally published. With skill and nuance, he illuminates the difficulty that ensues through the Scripture's contradictory teachings on Islam's manifestation in the world, teachings that have brought about a crisis for modern Muslims living in both the West and the westernizing worlds where a Muslim's obligation to Islamicize is met with anxiety and distrust. *The Qur'an and the West* offers a means of study that reaches for a deeper knowledge of the Qur'an, engendering a new understanding of its holy teachings and opening a means for a fruitful discourse.

Symmetry 2 I. Hargittai, 2016-02-25 *Symmetry 2* aims to present an overview of the contemporary status of symmetry studies, particularly in the arts and sciences, emphasizing both its role and importance. Symmetry is not only one of the fundamental concepts in science but is also possibly the best unifying concept between various branches of science, the arts, and other human activities. Whereas symmetry has been considered important for centuries primarily for its aesthetic appeal, this century has witnessed a dramatic enhancement of its status as a cornerstone in the sciences. In addition to traditionally symmetry-oriented fields such as crystallography and spectroscopy, the concept has

made headway in fields as varied as reaction chemistry nuclear physics and the study of the origin of the universe The book was initiated in response to the success of the first volume which not only received good reviews but received the award for The Best Single Issue of a Journal by the Association of American Publishers for 1986 The second volume extends the application of symmetry to new fields such as medical sciences and economics as well as investigating further certain topics introduced in Symmetry The book is extensively illustrated and with over 64 contributions from 16 countries presents an international overview of the nature and diversity of symmetry studies today
