The Meanest and 'Damnest' Job Michael P. Rucker,2019-08-01 Most Civil War histories focus on the performance of top level generals However it was the individual officers below them who actually led the troops to enact the orders Some of these were remarkably effective One

such officer was Edmund Winchester Rucker. He was a force to be reckoned with both during the Civil War and in his post-war business ventures. He was courageous, tough, and resourceful and achieved significant results in every assignment. During the campaign by the United States Army to capture the upper Mississippi River, Rucker and his faithful Confederate artillerymen with only three operable cannons held off the entire Federal fleet which possessed 105 heavy guns. Later in East Tennessee, Rucker's duties included punishing saboteurs and conscripting unwilling local citizens into the Confederate Army. He described these assignments as "The meanest and damnest sic duty a soldier had to perform." Following the battles for Chattanooga, he served with General Nathan Bedford Forrest as a cavalry brigade commander, earning high merits for his performance. Rucker's leadership was a major factor in the Confederate victory in the Battle of Brices Cross Roads, which has been called History's Greatest Cavalry Battle. Subsequent to the Battle of Nashville, Rucker was wounded and captured, although his left arm was amputated, this did not impede his future achievements. After the war, Colonel Rucker and General Forrest became business partners in a railroad building project. Rucker did well from this venture and became one of the wealthiest early entrepreneurs in Birmingham. In recognition of his many accomplishments, Fort Rucker, Alabama, was named in his honor. This first biography on his life examines at a fast-moving pace the military and business accomplishments of this outstanding leader who left his mark on both the Civil War and Southern industry of the time.

Crossings and Dwellings

Kyle B. Roberts, Stephen Schloesser, J.S., 2017-07-31. In *Crossings and Dwellings*, Kyle Roberts and Stephen Schloesser bring together essays by eighteen scholars in one of the first volumes to explore the work and experiences of Jesuits and their women religious collaborators in North America over two centuries following the Jesuit Restoration. Long dismissed as anti-liberal, anti-nationalist, and ultramontanist, restored Jesuits and their women religious collaborators are revealed to provide a useful prism for looking at some of the most important topics in modern history: immigration, nativism, urbanization, imperialism, secularization, anti-modernization, racism, feminism, and sexual reproduction. Approaching this broad range of topics from a variety of disciplinary perspectives, this volume provides a valuable contribution to an understudied period.

Sailing School Margaret E. Schotte, 2019-07-30. *Hands on science in the Age of Exploration*. Winner of the John Lyman Book Award in Naval and Maritime Science and Technology by the North American Society for Oceanic History and the Leo Gershoy Prize by the American Historical Association. Throughout the Age of Exploration, European maritime communities bent on colonial and commercial expansion embraced the complex mechanics of celestial navigation. They developed schools, textbooks, and instruments to teach the new mathematical techniques to sailors. As these experts debated the value of theory and practice, memory and mathematics, they created hybrid models that would have a lasting impact on applied science. In *Sailing School*, a richly illustrated comparative study of this transformative period, Margaret E. Schotte charts more than two hundred years of navigational history as she investigates how mariners solved the challenges of navigating beyond sight of land. She begins by outlining the influential sixteenth-century Iberian model for training and certifying nautical practitioners.

She takes us into a Dutch bookshop stocked with maritime manuals and a French trigonometry lesson devoted to the idea that navigation is nothing more than a right triangle The story culminates at the close of the eighteenth century with a young British naval officer who managed to keep his damaged vessel afloat for two long months thanks largely to lessons he learned as a keen student This is the first study to trace the importance for the navigator s art of the world of print Schotte interrogates a wide variety of archival records from six countries including hundreds of published textbooks and never before studied manuscripts crafted by practitioners themselves Ultimately Sailing School helps us to rethink the relationship among maritime history the Scientific Revolution and the rise of print culture during a period of unparalleled innovation and global expansion Publishers' circular and booksellers' record ,1886 *Walford's Concise Guide to Reference Material* Albert John Walford,1992 This is a shortened version of the three volume Walford s Guide to Reference Material 5th edition Volume 1 Science and Technology 1989 Volume 2 Social and historical sciences philosophy and religion 1990 and Volume 3 Generalia language and literature the arts 1991 There are more than 3 000 entries forming an updated compilation of what are considered to be the basic items in the main volumes plus some more recent material up to April 1992 **The Publishers Weekly** ,2000 *Paperbound Books in Print* ,1983 Publishers' Circular and General Record of British and Foreign Literature, and Booksellers' Record , **Forthcoming Books** Rose Arny,1997
