**The New Martians** Nick Kanas, 2013-08-30 The year is 2035 and the crew from the first expedition to Mars is returning to Earth

The crewmembers are anxious to get home and ennui pervades the ship. The mood is broken by a series of mysterious events that jeopardize their safety. Someone or something is threatening the crew. Is it an alien being? A psychotic crewmember? A malfunctioning computer? The truth raises questions about the crewmembers' fate and that of the human race. In this novel, the intent is to show real psychological issues that could affect a crew returning from a long duration mission to Mars. The storyline presents a mystery that keeps the reader guessing, yet the issues at stake are based on the findings from the author's research and other space-related work over the past 40 years. The novel touches on actual plans being discussed for such an expedition as well as notions involving the search for Martian life and panspermia. The underlying science, in particular the psychological, psychiatric, and interpersonal elements, are introduced and discussed by the author in an extensive appendix.

Nick Kanas is an Emeritus Professor of Psychiatry at the University of California, San Francisco, where he directed the group therapy training program. For over 20 years, he conducted research on group therapy, and for nearly 20 years after that, he was the Principal Investigator of NASA-funded research on astronauts and cosmonauts. He is the co-author of *Space Psychology and Psychiatry*, which won the 2004 International Academy of Astronautics Life Science Book Award, and the author of *Humans in Space: The Psychological Hurdles*, which won the 2016 International Academy of Astronautics Life Science Book Award. Dr. Kanas has presented talks on space psychology and on celestial mapping at several regional and Worldcon science fiction conventions. A Fellow of the Royal Astronomical Society, London, he has been an amateur astronomer for over 50 years and is an avid reader of science fiction. He is also the author of two non-fiction books, *Star Maps: History, Artistry, and Cartography* and *Solar System Maps: From Antiquity to the Space Age*, and two science fiction novels, *The New Martians* and *The Protos Mandate*, all published by Springer.

**The Partnership** Edward Clinton Ezell, Linda Neuman Ezell, 2013-01-16. The 1975 Apollo-Soyuz Test Project (ASTP) was the first joint U.S.-Soviet space flight in which teams from the two nations met in orbit to test an international docking system and conduct both collaborative and independent studies. Although primarily a symbol of international goodwill, the mission provided useful experience for future cooperative ventures between the two nations. This authorized NASA history features many fascinating interviews with participants as well as firsthand observations of ASTP activities. Because details of the Soviet space program remained shrouded in secrecy during the ASTP, the story is told from the American perspective. No scientific background is necessary to appreciate the narrative, which focuses on the participants' working relationships rather than the technical aspects of their jobs. Starting with the early years of the Cold War competition, it traces the formation of an alliance between NASA and Soviet Academy engineers in developing a test project, training the crew, and the triumphant flight. Eighty-six pages of photographs include twelve full-color pages with images of Earth from space.
