1977 NASA Authorization United States. Congress. House. Committee on Science and Technology. Subcommittee on Space Science and Applications, 1975 **Field-Assisted Sintering** Eugene A. Olevsky, Dina V. Dudina, 2018-08-09 This book represents the first ever scientific monograph including an in depth analysis of all major field assisted sintering techniques Until now the electromagnetic field assisted technologies of materials processing were lacking a systematic and generalized description in one fundamental publication this work promotes the development of generalized concepts and of comparative analyses in this emerging area of materials fabrication This book describes modern technologies for the powder processing based fabrication of advanced materials New approaches for the development of well tailored and stable structures are thoroughly discussed Since the potential of traditional thermo mechanical methods of material treatment is limited due to inadequate control during processing the book addresses ways to more accurately control the resultant material's structure and properties by an assisting application of electro magnetic fields The book describes resistance sintering high voltage consolidation sintering by low voltage electric pulses including spark plasma sintering flash sintering microwave sintering induction heating sintering magnetic pulse compaction and other field assisted sintering techniques Includes an in depth analysis of all major field assisted sintering techniques Explains new techniques and approaches for material treatment Provides detailed descriptions of spark plasma sintering microwave sintering high voltage consolidation magnetic pulse compaction and various other approaches when field assisted treatment is applied *Flash Flood Forecasting* A. J. Hall, World Meteorological Organization, 1981 *Nations of the World: Abbott, J. S. C. Italy*, 1898 *Supreme Court*, *Animals in Space* Colin Burgess, Chris Dubbs, 2007-07-05 Many readers will doubtless be astonished to learn that animals were being fired aloft in U S and Soviet research rockets in the late 1940s In fact most people not only believe that the Russian space dog Laika was the first canine to be launched into space but also that the high profile precursory Mercury flights of chimps Ham and Enos were the only primate flights conducted by the United States In fact both countries had sent literally dozens of animals aloft for many years prior to these events and continued to do so for many years after Other latter day space nations such as France and China would also begin to use animals in their own space research *Animals in Space* will explain why dogs primates mice and other rodents were chosen and tested at a time when dedicated scientists from both space nations were determined to establish the survivability of human subjects on both ballistic and orbital space flights It will also recount the way this happened the secrecy involved and the methods employed and offer an objective analysis of how the role of animals as spaceflight test subjects not only evolved but subsequently changed over the years in response to a public outcry led by animal activists It will explore the ways in which animal high altitude and space flight research impacted on space flight biomedicine and technology and how the results both successful and disappointing allowed human beings to then undertake that same hazardous journey with far greater understanding and confidence This book is intended

as a detailed yet highly readable and balanced account of the history of animal space flights and the resultant application of hard won research to space technology and astrobiology It will undoubtedly become the ultimate authority on animal space flights *1977 NASA Authorization: part 1, hearings held Oct. 13-Nov. 18, 1975* United States. Challenging Contextuality , 2024-07-31 Challenging Contextuality Bibles and Biblical Scholarship in Context provides a new and innovative contribution to the study of biblical texts by bringing together current approaches to biblical interpretation The volume sets the agenda for the future of the field and provides a synthesis of approaches to date In doing so it aligns itself with the broadly shared hermeneutical conviction that contextuality is a catalyst for interpretation This applies in equal measure to approaches and methods that are often framed as traditional or mainstream e g the methodological canon of the historical critical approach as the offspring of the European Enlightenment and those that are often dubbed contextual e g forms of feminist or indigenous interpretation The volume grounds contextual biblical interpretation within the broader landscape of biblical studies and the chapters are all interested in the contexts in which bibles are read Rather than a series of examples of contextual biblical interpretation this book is concerned with what it means to do contextual biblical interpretation how contextual biblical interpretation challenges biblical scholarship and what chances there are for this mode of inquiry What contexts are engaged and elucidated when it comes to bible use What contexts are made visible and invisible How can different contexts be theorized and understood The volume argues that it is not context that matters rather contemporary contexts should be a challenge and a chance for biblical scholarship its present and its future
