Leibniz on Time, Space, and Relativity Richard T. W. Arthur, Richard Arthur, 2021 In this book Arthur gives fresh interpretations of Gottfried Leibniz's theories of time space and the relativity of motion based on a thorough examination of Leibniz's manuscripts as well as his published papers These are analysed in historical context but also with an eye to their contemporary relevance Leibniz's views on relativity have been extremely influential first on Mach and then on Einstein while his novel approach to geometry in his analysis situs inspired many later developments in geometry Arthur expounds the latter in some detail explaining its relationship to Leibniz's metaphysics of space and the grounding of motion and defending Leibniz's views on the relativity of motion against charges of inconsistency The brilliance of his work on time though has not been so well appreciated and Arthur attempts to remedy this through a detailed discussion of Leibniz's relational theory of time showing how it underpins his theory of possible worlds his complex account of contingency and his highly original treatment of the continuity of time providing formal treatments in an appendix In other appendices Arthur provides translations of previously untranslated writings by Leibniz on analysis situs and on Copernicanism as well as an essay on Leibniz's philosophy of relations In his introductory chapter he explains how the framework for the book is provided by the interpretation of Leibniz's metaphysics he defended in his earlier *Monads Composition and Force* OUP 2018 winner of the 2019 annual JHP Book Prize for best book in the history of philosophy published in 2018

T. F. Torrance's Reconstruction of Natural Theology Alexander J. D. Irving,2019-07-15 T F Torrance s proposal for natural theology constitutes one of the most creative and provocative elements in his work By re envisioning natural theology as the cognitive structure of theology determined by God s self revelation in Jesus Christ and not as the task of philosophically reflecting on the nature or existence of God aside from religious presuppositions Torrance moves through and beyond Barth s resistance to natural theology This book establishes Torrance s unique reconstruction of natural theology within its proper intellectual context providing a fresh analysis of this important methodological innovation as it emerges from Torrance s realist epistemology As Irving demonstrates in Torrance s distinctive conception of science he operated with an approach to cognition that functions via a realist synthesis of experience and understanding and in Torrance s theological science this synthesis of experience and understanding is the synthesis of revealed theology and natural theology The author argues that this reconstruction of natural theology expresses a dramatic vision for human agency within theological cognition adding the necessity of the human knowing subject to the priority of the divine revealer Finally this book marries Torrance s accomplishments in reconstructing natural theology to his Christocentric theological method in which God is both revealed and known in the person of Jesus Christ fully God and fully human
