Item Analysis Summary

10. D. Correctness

- A. The student does not subtract the amount of the items given.
- B. The student subtracts the 2,100 but does not subtract the price amount, multiplying from 2,100 and then adding from the 2,100 given.
- C. The student does not subtract correctly in the multiplication and then adds.

11. C. Correctness

- A. The student incorrectly calculates the denominator by subtracting the denominator multiplying the denominator.
- B. Correct answer.
- C. The student incorrectly calculates the denominator by adding the denominator of the denominator.
- D. The student incorrectly calculates the denominator by dividing both the numerator and the denominator.

12. B. The student does not use the order of operations correctly.

- A. Correctness.
- B. The student does not use the order of operations correctly.
- C. The student does not use the order of operations correctly.

13. C. The student does not find the greatest common factor.

- A. The student finds the product of the two numbers, then divides it by the two numbers.
- B. The student does not find the greatest common factor.
- C. Correctness.

14. **Sample:** The student demonstrates a thorough understanding of multiplying and finding least common multiples and prime numbers. The student explains the length and width of the hallway, converts mixed numbers to $1\frac{1}{2}$ and $1\frac{2}{3}$ to find a least common multiple of 6. The student shows working, explains work for both parts and provides clear and complete explanations.

Sample: The student demonstrates an understanding of multiplying and finding least common multiples and prime numbers, but the student's work is not fully explained. Explanations are somewhat unclear but do show understanding.

Sample: The student demonstrates a partial understanding of multiplying and finding least common multiples and prime numbers. The student's work and explanations demonstrate a lack of general understanding.

Sample: The student demonstrates minimal understanding of multiplying and finding least common multiples and prime numbers. The student's response is incomplete and demonstrates little.

Sample: The student cannot or chooses a completely incorrect or unreasonable response or a nonsensical explanation, indicating a lack of understanding of multiplying and finding least common multiples and prime numbers.

Math, Grade K Thomas Richards, Spectrum, 2002-06-01 Now updated and revised the Spectrum Math series offers grade appropriate coverage of basic arithmetic and math skills Each book features drill practice in math fundamentals as well as applications of mathematics in everyday settings El-Hi Textbooks in Print, 1984 *An Introduction To The Method Of Fundamental Solutions* Alexander H-d Cheng, Ching-shyang Chen, Andreas Karageorghis, 2025-03-11 Over the past two decades the method of fundamental solutions MFS has attracted great attention and has been used extensively for the solution of scientific and engineering problems The MFS is a boundary meshless collocation method which has evolved from the boundary element method In it the approximate solution is expressed as a linear combination of fundamental solutions of the operator in the governing partial differential equation One of the main attractions of the MFS is the simplicity with which it can be applied to the solution of boundary value problems in complex geometries in two and three dimensions The method is also known by many different names in the literature such as the charge simulation method the de singularization method the virtual boundary element method etc Despite its effectiveness the original version of the MFS is confined to solving boundary value problems governed by homogeneous partial differential equations To address this limitation we introduce various types of particular solutions to extend the method to solving general inhomogeneous boundary value problems employing the method of particular solutions This book consists of two parts Part I aims to provide theoretical support for beginners In the spirit of reproducible research and to facilitate the understanding of the method and its implementation several MATLAB codes have been included in Part II This book is highly recommended for use by post graduate researchers and graduate students in scientific computing and engineering *Graduated school arithmetic.
