Pulling Back the Curtain on Qualitative Research William Thompson, Mica Thompson, 2022-12-30 In *Pulling Back the Curtain on Qualitative Research*, the authors maintain that for sociologists the entire world is a laboratory. Seldom do they attend social gatherings without observing people and their interaction in a systematic and intellectually curious way. Regular trips to the grocery store, church services, and engagement with social media all open the door to sociological questioning and encourage forms of empirical observation and data collection. Here, in this practical and in-depth guide to conducting qualitative sociological field research, the authors offer step-by-step guidance to the processes of choosing a research question and forming research objectives, gaining entry to research settings, and reporting and analyzing findings. Each chapter features a past research assignment wherein the authors draw attention to important ethical considerations and extract the many lessons, quirks, and unanticipated findings they experienced along the way that readers should prepare for and apply while conducting their own qualitative fieldwork. Over the span of several field studies, this book offers readers a behind-the-scenes look at some tested and trusted qualitative methodologies. Designed to be a guide for undergraduate and graduate-level students, its real-life meditations would make a meaningful addition to anyone serious about conducting sociological research.

Cases in Mathematics Teacher Education Margaret S. Smith, Susan N. Friel, 2015-10-01 Originally published in 2008, the goal of AMTE Monograph 4 *Cases in Mathematics Teacher Education: Tools for Developing Knowledge Needed for Teaching* is to provide detailed accounts of case use that will inform the mathematics teacher education community on the range of ways in which cases can be used to foster teacher learning and the capacity to reflect on and learn from teaching. The chapters in this monograph describe the use of cases with preservice and practicing teachers at all levels K-12 in content and methods courses as well as professional development settings and focus on developing various aspects of teachers' knowledge base: i.e., content, pedagogy, and students as learners. Hence, Monograph 4 should prove to be a superb resource for mathematics teacher educators.

it better Cutting the Edge Jeffrey Ian Ross, 2011-12-31 Understanding crime criminals and criminal justice from a radical critical perspective is indispensable in today's academic applied research and policy sectors. Neglect of this approach leads to narrow mindedness and the probability of repeating past mistakes or reinventing the wheel. Cutting the Edge by Jeffrey Ian Ross will encourage individuals and organizations especially students and instructors to innovatively identify ways of experimenting with new policy initiatives designed to improve not only criminal justice but social and human justice as well. Ross has significantly changed this volume to include six new chapters and three revised ones as well. The studies chosen demonstrate the difference between critical criminology and other approaches used to study and explain criminological phenomena. The authors do not approach the inequalities of the criminal justice system as phenomena that should be studied but as wrongs that must be righted. Cutting edge critical criminology combines concerns about fairness in punishment tools of class analysis and the insights of feminism postmodernism and ethnography. The authors included here wield these newer tools with elegance and enthusiasm. Written with passion by experts in the field the book engages the mind as fully as it engages the emotions.
