

26. Classical Mechanics: Lagrangian & Hamiltonian

Mathematically, what we're really doing is saying that there is a certain Lagrangian associated to a system, the action integral, which is then varied to get the path. This is what's called the principle of least action. The Lagrangian is a function of position and velocity, and the action is the integral of the Lagrangian over time.

Now, what if we consider a system with a certain Lagrangian, and we vary it, and we get a new Lagrangian. This is what's called a gauge transformation. The Lagrangian is a function of position and velocity, and the action is the integral of the Lagrangian over time. The Lagrangian is a function of position and velocity, and the action is the integral of the Lagrangian over time.

Figure 2.1: Icons

- 1. The Lagrangian is a function of position and velocity.
- 2. The action is the integral of the Lagrangian over time.
- 3. The principle of least action states that the path of a system is the one that minimizes the action.
