nothing to do with the taking of state power This is in clear opposition to the traditional Marxist theory of revolution which centres on the overthrow of government In this book John Holloway asks how we can reformulate our understanding of revolution as the struggle against power not for power After a century of failed attempts by revolutionary and reformist movements to bring about radical social change the concept of revolution itself is in crisis John Holloway opens up the theoretical debate reposing some of the basic concepts of Marxism in a critical development of the subversive Marxist tradition represented by Adorno Bloch and Lukacs amongst others and grounded in a rethinking of Marx's concept of fetishisation how doing is transformed into being

Manifolds and Submanifolds Vladimir Rovenski, 2012-12-06 This monograph is based on the author's results on the Riemannian geometry of foliations with nonnegative mixed curvature and on the geometry of submanifolds with generators rulings in a Riemannian space of nonnegative curvature. The main idea is that such foliated submanifolds can be decomposed when the dimension of the leaves generators is large. The methods of investigation are mostly synthetic. The work is divided into two parts consisting of seven chapters and three appendices. Appendix A was written jointly with V. Toponogov. Part 1 is devoted to the Riemannian geometry of foliations. In the first few sections of Chapter I we give a survey of the basic results on foliated smooth manifolds. Sections 1.1.1-1.1.3 and finish in Section 1.4 with a discussion of the key problem of this work: the role of Riemannian curvature in the study of foliations on manifolds and submanifolds.
