Standards,1977 **Patient Teaching Manual** ,1987 *Successfully Implementing Microsoft Dynamics™* Reinder

Koop,Ester Muris,2007-06-07 Does the implementation of Microsoft Dynamics™ contribute to the goals of your company

Does your company itself have the capacity to build a bridge between the Business and IT Can your employees adopt a flexible attitude on all the related changes And probably even more important is that what they are also willing to do If you are striving for a full hearted yes to these questions this is the book for you Regatta Dynamics our methodology for the

structured implementation of Microsoft Dynamics™ is based on our firm belief that when you implement Microsoft Dynamics™ there must be a balance between the Business and IT. The consistency and cohesion between the different underlying work streams are hereby of overriding importance for the ultimate result. In this book we answer the questions mentioned above and describe pragmatically the full implementation process from A to Z. Emphasis is placed on the organizational component of the implementation process and the cohesion with functional and technical processes. In our opinion, by involving the organization properly during the change process, your company can benefit much more and much faster from Microsoft Dynamics™. Next to being a blueprint for the implementation complexity, this book can also be used as a guideline for daily practice. This book is therefore interesting for project and line managers, key users, IT managers and implementation consultants. The authors are both working in the field of implementation. While writing this book, they have drawn from their many years of experience in this field within Sogeti Netherlands. Wherever possible, the authors have tried to change every challenge from unmanageable to comprehensible and based on clearly separated sequences, the pluriform reality of implementation has been reduced to acceptable proportions that can be planned and managed. Main goal to achieve is to continuously create a tangible and remarkably better result for organizations who are considering implementing Microsoft Dynamics™.
