Gacula, Jr., 2008-06-02. In defining sensory properties of products, descriptive techniques that utilize trained panels are used. Arthur D. Little, Inc. pioneered a descriptive technique in the 1950s known as the Flavor Profile, that laid the foundation for the development of current descriptive techniques used today in academia and industry. Several collections of published papers are reprinted in this book. The main areas covered include dairy products, meats, alcoholic beverages, textile materials, and general applications. In addition, Dr. Gacula has prepared 40 pages of new text material on 1. Descriptive Sensory Analysis Methods and 2. Computer Software Methods for statistical systems. Lam, Paul Reynolds, Sean M. Swehla, Jez Wain, IBM Redbooks, 2012-05-23. Managing IT systems is difficult. Virtualization brings numerous benefits to the datacenter and system administrators. However, it also creates a new set of choices. More choice implies more decisions and thus an increased management responsibility. Furthermore, the move toward cloud computing with a service-based acquisition and delivery model requires that datacenter managers take a holistic view of the resources that they manage and the actors that access the data center. IBM Service Delivery Manager addresses this problem domain. Delivered as a set of

appliances it automates provisioning deprovisioning metering and management of an IT platform and the services it provides It addresses the needs of both IT management and service users This IBM Redbooks publication is intended for technical professionals who want to understand and deploy IBM ISDM Cloud on a Power platform
