*Air, Earth, Fire, and Water* David Elliott,2025-07-17 We celebrate distinctive attributes of Creation its orderly structure measurable

processes using an elementary analysis of the precision of Earth's systems. Scriptural principle and scientific knowledge are compared at an uncomplicated level to guide the learner to greater knowledge of the Creator. The character of God is seen in the Air, the heavens and atmosphere, the Earth, the geosphere, Fire, energy and Water, the hydrosphere. A fifth element, Ether, proclaims the grace of nature, evidence of God's providence and Earth's resilience. The five elements borrowed from Greek philosophy track the divinely ordered Creation account. These spheres work in tandem to collectively sustain life on Earth, converging at the soil from which God made living beings, the biosphere, notably humans. We survey these domains, review man's connection and their interdependence, and guide the reader to see that the visible Creation was placed before us to help us perceive the invisible Kingdom of God, we call this the Romans 1:20 Principle. His truth, seen in its order and His grace, seen in its providence and resilience, make Creation a suitable home for us.
