**Trade and the Environment** Brian R. Copeland, M. Scott Taylor, 2013-12-03 Nowhere has the divide between advocates and critics of globalization been more striking than in debates over free trade and the environment And yet the literature on the subject is high on rhetoric and low on results This book is the first to systematically investigate the subject using both economic theory and empirical analysis Brian Copeland and Scott Taylor establish a powerful theoretical framework for examining the impact of international trade on local pollution levels and use it to offer a uniquely integrated treatment of the links between economic growth liberalized trade and the environment The results will surprise many The authors set out the two leading theories linking international trade to environmental outcomes develop the empirical implications and examine their validity using data on measured sulfur dioxide concentrations from over 100 cities worldwide during the period from 1971 to 1986 The empirical results are provocative For an average country in the sample free trade is good for the environment There is little evidence that developing countries will specialize in pollution intensive products with further trade In fact the results suggest just the opposite free trade will shift pollution intensive goods production from poor countries with lax regulation to rich countries with tight regulation thereby lowering world pollution The results also suggest that pollution declines amid economic growth fueled by economy wide technological progress but rises when growth is fueled by capital accumulation alone Lucidly argued and authoritatively written this book will provide students and researchers of international trade and environmental economics a more reliable way of thinking about this contentious issue and the methodological tools with which to do so *Faithful Economics* James W. Henderson, John Lee Pisciotta, 2005 In particular this volume demonstrates how Christianity shapes the worldview an economist brings to the task the questions an economist asks and the policies an economist advocates **International Trade and the Environment** Judith M. Dean, 2017-10-23 This title was first published in 2002 The interrelationship between international trade and the environment has become the subject of much heated debate These complex and strong concerns are given voice in this comprehensive and accessible text that brings together the leading journal articles dealing with the fundamental questions about this most important international problem International Trade and the Environment offers an invaluable source of contemporary international research for all those researching studying or practicing across the fields of international trade environmental economics applied microeconomics and other related areas *Foreign Direct Investment, Governance, and the Environment in China* J. Zhang, 2014-01-01 This book links the environment and corruption with China's large inflows of foreign direct investment FDI It investigates the effects of economic development and foreign investment on pollution in China the effects of corruption and governance quality on FDI location choice in China *The Economics of the Environment and Natural Resources* Quentin Grafton, Wiktor Adamowicz, Diane Dupont, Harry Nelson, Robert J. Hill, Steven Renzetti, 2008-04-15 The Economics of the Environment and Natural Resources covers the essential topics students need to understand environmental and resource

problems and their possible solutions Its unique lecture format provides an in depth exploration of discrete topics ideal for upper level undergraduate graduate or doctoral study Each chapter depicts the key theoretical insights major issues and real life problems that motivate the subject In addition the chapters feature practical applications and case studies a list of annotated further reading and extensive references Offers broad treatment of issues in Environmental and Resource Economics Provides in depth exploration of a wide range of topics with its unique lecture format Depicts key theoretical insights major issues and real life problems for each subject Features case studies annotated further reading extensive references and a detailed glossary

**Economics of the Environment** Horst Siebert, 2008-01-03 The book interprets nature and the environment as a scarce resource It offers a theoretical study of the allocation problem and describes different policy approaches to the environmental problem The entire spectrum of the allocation issue is studied The author incorporates several economic approaches including neoclassical analysis the public goods approach and optimization theory The different aspects of environmental allocation are studied in the context of a single model that is used throughout the book The sixth edition includes new sections on ethical aspects of environmental evaluation and international emission trading and biodiversity

**Economic Justice in a Flat World** Steven Rundle, 2009-08-07 Writers urge the church to help identify the essentials of Christian perspective on the societal environmental and economic implications of globalization and to live accordingly *Canadiana*, 1991

Economic Costs and Consequences of Environmental Regulation Wayne B Gray, 2018-01-18 This title was first published in 2002 How expensive is environmental regulation and how does it affect the economy A proper understanding of the costs imposed by environmental regulation is important for policy makers and others concerned with regulatory design This book focuses on empirical studies of the impact of environmental regulation on the economy exposing the reader to a variety of estimation methodologies and datasets that have been used in this area Three basic sources provide information on the costs of environmental regulation surveys engineering studies and econometric analysis This text draws on all three in its investigation

**Trade and Climate Change** Ludivine Tamiotti, United Nations Environment Programme, 2009 This report aims to improve understanding about the linkages between trade and climate change It shows that trade intersects with climate change in a multitude of ways For example governments may introduce a variety of policies such as regulatory measures and economic incentives to address climate change This complex web of measures may have an impact on international trade and the multilateral trading system

East Asia Integrates Kathie Krumm, Homi Kharas, 2004-01-01 Emerging East Asian economies have seen their share of world exports more than triple during the past quarter century and intraregional trade has driven this growth Broad measures of development in East Asia have improved at the same headlong pace Why push further integration now Two economic events of historic proportions provide the context strategic thinking of development in the region following the East Asian financial crisis of 1997-98 and the accession of China to the World Trade Organization Policymakers interested in a stable prosperous region are concerned

by mildly rising inequality within countries and a widening gap between richer economies and the poorest economies Increasingly the development agenda in the region with its focus on growth jobs and social stability and the trade policy agenda with its focus on market access and competitiveness have become intertwined East Asian policymakers seek to develop a coherent set of economic policies that can deliver stability growth and regional integration Without attempting to be comprehensive East Asia Integrates offers fundamental strategies that promote cross border flows of trade along with domestic policies on logistics trade facilitation standards and institutions to maximize the impact of these flows on development and distribute the gains from trade widely As the authors demonstrate multilateral and regional trade initiatives must provide a compelling vision of how integration can deliver broadly shared growth and prosperity if they are to succeed In addition they must use the momentum offered by trade agreements to address the links between trade on the one hand and social stability poverty reduction and growth on the other

**How the Chinese System of Charges and Subsidies Affects Pollution Control Efforts by China's Top Industrial Polluters** Hua Wang,Ming Chen,1999 China s unique combination of emissions charges and pollution abatement subsidies has given China s most heavily polluting industrial firms incentive to invest in pollution abatement

**Growth and Institutions in African Development** Augustin K. Fosu,2015-03-24 Recent years have seen a sustained research effort exploring the African development experience The extant literature has offered a large set of explanations as to why the African development record has lagged behind that of other regions of the developing world This new volume brings international contributors together to focus on the role of growth and institutions First it provides brief evidence on the growth and institutional records as well as on development outcomes during the post independence period Second it targets certain growth determinants including industrial embeddedness innovation exchange rate regimes and environmental quality Third it sheds light on the dynamics and distribution of growth and on growth enhancing sectors of the economy Finally it investigates several issues of institutional development as well as institutions generating development outcomes Though focused on these two key areas the coverage strives to achieve a comprehensive analysis of how Africa s development may have been enhanced or undermined and to offer lessons for the future This volume is essential reading for all scholars of development economics and development studies

**Trade and the Environment** ,2011 **Getting the Most Out of Free Trade Agreements in Central America** J. Humberto Lopez,Rashmi Shankar,2011-06-21 The main message of the study is that Central America s ability to exploit the opportunities created by ongoing trade liberalization will depend on the ability of the region to implement a complementary policy agenda that creates an enabling policy and institutional environment
