Begin by highlighting what works well in the piece. Positive feedback sets a constructive tone while fostering belief in oneself as a writer.

1

2

BALANCE IS KEY

Strive for a balance between pointing out strengths and suggesting areas for improvement to motivate growth while acknowledging the writer's efforts.

GET SPECIFIC

Offer specific examples and suggestions rather than general comments. This helps the writer pinpoint exactly what needs attention and how to enhance it.

3

4

RESPECT INDIVIDUAL VOICES

Encourage students to respect each other's writing style and voice. Peer review is about improving without imposing personal preferences.

TONE MATTERS

Emphasize the importance of delivering feedback respectfully and kindly. Constructive criticism should always be framed with empathy and understanding.

occupational hazards during their employment in the nuclear weapons industry In response to the concerns expressed by workers and their representatives DOL asked the Institute of Medicine IOM to review the SEM database and its use of a particular database Haz Map as the source of its toxic substance occupational disease links Accordingly this IOM consensus report reflects careful consideration of its charge by the committee and describes the strengths and shortcomings of both To complete its task IOM formed an ad hoc committee of experts in occupational medicine toxicology epidemiology industrial hygiene public health and biostatistics to conduct an 18 month study to review the scientific rigor of the SEM database The committee held two public meetings at which it heard from DOL Division of Energy Employee Occupational Illness Compensation DEEOIC representatives the DOL contractor that developed the SEM database the developer of the Haz Map database DOE worker advocacy groups and several individual workers The committee also submitted written questions to DOL to seek clarification of specific issues and received written responses from DEEOIC The committee s report considers both the strengths and weaknesses of the SEM and the Haz Map databases recognizing that the latter was developed first and for a different purpose The committee then discusses its findings and recommends improvements that could be made in both databases with a focus on enhancing the usability of SEM for both DOL claims examiners and for former DOE workers and their representatives Review of the Department of Labor s Site Exposure Matrix Database summarizes the committee s findings
