Classic Ferrari Jed Paine, 2021-04-16 Ferraris are best known for their sleek, stunning and curvaceous design, eye watering price tag and standard rosso corsa race red paintwork. From the very first Ferrari, the 1947 Tipo 125 S racing sports car through to the more recent 2013 LaFerrari mild hybrid limited edition road car, Ferrari have continued to astound enthusiasts and critics alike with their evolutionary performance road vehicles and unrivalled Formula 1 racing pedigree. Yet motoring history might have been so different. Enzo Ferrari was a reluctant manufacturer. He initially built and sold production vehicles purely to fund his Scuderia Ferrari racing team. For every success on the track though came a wave of innovation to be applied to their production cars. The F1 gearbox was one of the most important technological transfers from racing car to grand tourer and was quickly followed by traction control. The next generation of Ferraris is set to be turbocharged as strict consumption and emission regulations will affect the future of engineering and there are even electric cars in Ferrari's sights too. The agenda includes more special editions, tailor made varieties and one off models although their core business will still lie in the GT road car market. It is a boyhood dream of many youngsters and grown men to own or at least drive a Ferrari. Unfortunately the majority do not go on to achieve this ambition but this book might go some way to filling the void and keeping the dream alive.
